- a. Select a method of communication of the experimental results. Identify a theoretical explanation. Replicate the experiment to strengthen the scientific nature of the results. In the presentation, consider a discussion of the limitations.
- b. Theoretical basis of the presentation. Identify the structures performed. A single layer of atoms is a quantum well. When the thickness becomes smaller than the Fermi wavelength, the system is called a quantum well.
- c. Structure of the presentation. Consider the structure of the quantum well. The structure of the quantum well is determined by the thickness of the well.
