Gaze Interaction and Applications of Eye Tracking: Advances in Assistive Technologies Majaranta, Päivi, 2011-10-31

Recent advances in eye tracking technology will allow for a proliferation of new applications. Improvements in interactive methods using eye movement and gaze control could result in faster and more efficient human computer interfaces benefitting users with and without disabilities. Gaze Interaction and Applications of Eye Tracking: Advances in Assistive Technologies focuses on interactive communication and control tools based on gaze tracking including eye typing, computer control and gaming with special attention to assistive technologies. For researchers and practitioners interested in the applied use of gaze tracking, the book offers instructions for building a basic eye tracker from off the shelf components, gives practical hints on building interactive applications, presents smooth and efficient interaction techniques and summarizes the results of effective research on cutting edge gaze interaction applications. Exploring the Use of Eye Gaze Controlled Interfaces in Automotive Environments Pradipta Biswas, 2016-08-04. This book provides a concise study of eye gaze tracking as a direct controller of electronic displays and interfaces inside cars and other vehicles. The author explores the prospect of controlling a vehicle's internal system via the driver's eye gaze and for the vehicles to analyse and respond to a driver's change in cognitive load too. New algorithms tackling micro saccadic eye movements and the inaccuracy in eye gaze tracking for controlling on screen pointers are presented and explored. Multimodal fusion algorithms involving eye gaze and finger tracking systems are presented and validated and important results have been obtained on gaze controlled interfaces and visual responses whilst encountering oncoming road hazards. A set of user trials to validate the algorithms involving driving simulators are also presented by the author. Exploring the Use of Eye Gaze Controlled Interfaces in Automotive Environments would be of great importance to researchers and designers alike within the fields of automotive design and engineering, human computer interaction, HCI and intelligent interfaces. **The Mind's Eye** Ralph Radach, Jukka Hyona, Heiner Deubel, 2003-06-05. The book provides a comprehensive state of the art overview of current research on cognitive and applied aspects of eye movements. The contents include peer reviewed chapters based on a selection of papers presented at the 11th European Conference on Eye Movements, Turku, Finland, 2001, supplemented by invited contributions. The ECCEM conference series brings together researchers from various disciplines with an interest to use eye tracking to study perceptual and higher order cognitive functions. The contents of the book faithfully reflect the scope and diversity of interest in eye tracking as a fruitful tool both in basic and applied research. It consists of five sections: visual information processing and saccadic eye movements, empirical studies of reading and language production, computational models of eye movements in reading, eye tracking as a tool to study human computer interaction and eye movement applications in media and communication research. Each section is concluded by a commentary chapter by one of the leading authorities in the field. These commentaries discuss and integrate the contributions in the section and provide an expert view on the most significant

present and future developments in the respective areas The book is a reference volume including a large body of new empirical work but also principal theoretical viewpoints of leading research groups in the field

Eye Tracking Methodology Andrew Duchowski, 2007-09-14 Despite the availability of cheap fast accurate and usable eye trackers there is little information available on how to develop implement and use these systems This 2nd edition of the successful guide contains significant additional material on the topic and aims to fill that gap in the market by providing an accessible comprehensive introduction Additional key features of the 2nd edition include Technical description of new state of the art eye tracking technology new chapters 9 10 and 11 a complete whole new Part describing experimental methodology including experimental design empirical guidelines and 5 case studies new chapters 13 14 and 15 survey material regarding recent research publications included within Part IV This second edition is a invaluable guide for practitioners responsible for developing or implementing an eye tracking system as can also be used as a teaching text for relevant modules on advanced undergraduate and postgraduate courses

A Handbook of Process Tracing Methods Michael Schulte-Mecklenbeck, Anton Kuehberger, Joseph G. Johnson, 2019-06-10 A Handbook of Process Tracing Methods demonstrates how to better understand decision outcomes by studying decision processes through the introduction of a number of exciting techniques Decades of research have identified numerous idiosyncrasies in human decision behavior but some of the most recent advances in the scientific study of decision making involve the development of sophisticated methods for understanding decision process known as process tracing In this volume leading experts discuss the application of these methods and focus on the best practices for using some of the more popular techniques discussing how to incorporate them into formal decision models This edition has been expanded and thoroughly updated throughout and now includes new chapters on mouse tracking protocol analysis neurocognitive methods the measurement of valuation as well as an overview of important software packages The volume not only surveys cutting edge research to illustrate the great variety in process tracing techniques but also serves as a tutorial for how the novice researcher might implement these methods A Handbook of Process Tracing Methods will be an essential read for all students and researchers of decision making
