It is worth thinking through how you can make the assessment process run smoothly, before entering into formal arrangements or contracts with a certifier, as this will reduce the timescales and cost of the certification.

We have noticed that certain things have worked well for previous Fishery Clients. Here are some ideas to consider:

Managing the pre-assessment and full assessment processes

The assessment process and the management of activities after a certificate is awarded require attention to both detail and timescales. You may find it useful to designate an individual to assist and monitor the assessment process and to be a point of contact for the certifier's assessment team. While the certifier is responsible for assessing the fishery, someone in your organisation should be responsible for ensuring you meet your obligations as the client, such as delivering any required information on time.

A small group of people who ensure that both the assessment process and post-certification requirements are managed in a timely and efficient fashion can also help. This group could include representatives from industry (fishermen and processors), the fishery management and/or research agencies and/or relevant stakeholders. Alternatively, it could simply involve a project management group from within your organisation.

Gathering information to place before the assessment will save you time and money. Here the captain (left) and expert assessment team visit one of the fishing vessels of the BURENNE seine fishery in Bretagne (see also the right the fishery client explains the details of the fishing operations).
