

Exhaust Feature

Vent Fan

The vent fan has two metal reusable vent filters. Models that recirculate air back into the room also use a charcoal filter.

Reusable Vent Filters

The metal filters trap grease released by foods on the cooktop. They also prevent flames from foods on the cooktop from damaging the inside of the oven.

For this reason, the filters must always be in place when the hood is used. The vent filters should be cleaned once a month, or as needed.

Removing and Cleaning the Filters

To remove, slide them to the rear using the tabs. Pull down and out.

To clean the vent filters, soak them and then swish around in hot water and detergent. Don't use ammonia or ammonia products because they will darken the metal. Light brushing can be used to remove embedded dirt. Rinse, shake and let dry before replacing.

To replace, slide the filters into the frame slots on the back of each opening. Press up and to the front to lock into place.

Charcoal Filter

The charcoal filter cannot be cleaned. It must be replaced. See back cover for ordering online at cafeappliances.com

If the model is not vented to the outside, the air will be recirculated through a disposable charcoal filter that helps remove smoke and odors.

The charcoal filter should be replaced when it is noticeably dirty or discolored (usually after 6 to 12 months, depending on usage). See **Optional Kits** page 30, for more information.

CHARCOAL FILTER REPLACEMENT

1. Unplug the microwave oven.
2. Remove the vent grille mounting screws.
3. Tip the grille forward, then lift out to remove.
4. Remove the charcoal filter.
5. Slide a new charcoal filter into place.
6. Slide the bottom of the vent grille into place. Push the top until it snaps into place. Replace the mounting screws.
7. Plug in the microwave oven.
