Economic Governance in Europe Federico Fabbrini, 2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union

Clientelism and Economic Policy Aris Trantidis, 2016-04-28 With its deep economic crisis and dramatic political developments Greece has puzzled Europe and the world What explains its long standing problems and its incapacity to reform its economy Using an analytic narrative and a comparative approach the book studies the pattern of economic reforms in Greece between 1985 and 2015 It finds that clientelism the allocation of selective benefits by political actors patrons to their supporters clients created a strong policy bias that prevented the country from implementing deep cutting reforms The book shows that the clientelist system differs from the general image of interest group politics and that the typical view of clientelism as individual exchange between patrons and clients has not fully captured the wide range and implications of this phenomenon From this the author develops a theory on clientelism and policy making addressing key questions on the politics of economic reform government autonomy and party politics The book is an essential addition to the literatures on clientelism public choice theory and comparative political economy It will be of key interest to scholars and students of European Union politics economic policy and party politics
