Popular Children's Literature in Britain Julia Briggs, Dennis Butts, 2016-12-05 The astonishing success of J K Rowling and other contemporary children's authors has demonstrated how passionately children can commit to the books they love But this kind of devotion is not new This timely volume takes up the challenge of assessing the complex interplay of forces that have created the popularity of children's books both today and in the past The essays collected here ask about the meanings and values that have been ascribed to the term popular They consider whether popularity can be imposed or if it must always emerge from children's preferences And they investigate how the Harry Potter phenomenon fits into a repeated cycle of success and decline within the publishing industry Whether examining eighteenth century chapbooks fairy tales science schoolbooks Victorian adventures waif novels or school stories these essays show how historical and publishing contexts are vital in determining which books will succeed and which will fail which bestsellers will endure and which will fade quickly into obscurity As they considering the fiction of Angela Brazil Enid Blyton Roald Dahl and J K Rowling the contributors carefully analyse how authorial talent and cultural contexts combine in often unpredictable ways to generate and sometimes even sustain literary success

Digging Into Popular Culture Ray Broadus Browne, Pat Browne, 1991 This volume presents archeological studies in conjunction with cultural anthropological studies as a means to enhance popular culture studies Scholar Malcolm K Shuman points out that the study of archeology must be careful to chart the total human content of an artifact because archeology is a profoundly human and humanizing endeavor that cannot be divorced from the matrix of human life The other ten essays cover aspects of archeology and cultural anthropology and the authors are meticulous in studying their subject in context Current Projects in Historical Lexicography John Considine, 2010-04-16 Current Projects in Historical Lexicography brings together seven papers by present and recent editors of historical dictionaries and lexical databases The collection is introduced with an overview of the history of historical lexicography from the ancient world to the present day with particular emphasis on the major nineteenth century dictionaries of German French English Dutch Swedish and Danish and on their successors In the first paper Javier Mart n Arista describes the present state of and the prospects for the Nerthus lexical database of Old English The next two introduce specialized dictionaries of the language of medieval and early modern texts Fernando Tejedo Herrero s comprehensive dictionary of the language of the great thirteenth century lawcode Siete Partidas and Juhani Norri s Dictionary of Medical Vocabulary in English 1375 1530 Marijke Mooijaart s paper discusses the online integration of the four historical dictionaries which cover Dutch from the earliest times to the twentieth century The next two papers Stefan Dollinger on the Dictionary of Canadianisms on Historical Principles and the Bank of Canadian English and Maggie Scott on the Concise Scots Dictionary describe projects to revise

twentieth century historical dictionaries as the language varieties which they register evolve Finally Jeremy Bergerson s paper presents a project for an etymologically rich historical dictionary of Afrikaans An appendix to the volume comprises two previously unpublished short documents by Katherine Barber and John Considine which bear on the history of the Dictionary of Canadianisms revision project The contributions to this volume offer a rare set of insights into ongoing lexicographical work addressing both methodological issues such as inclusion criteria and the balance between diachronic and synchronic coverage and practical issues such as publication media and funding
