Recent Developments in Electronics and Communication Systems KVS Ramachandra Murthy, S. Kumar, M. Kumar Singh, 2023-01-31 Often no single field or expert has all the information necessary to solve complex problems, and this is no less true in the fields of electronics and communications systems. Transdisciplinary engineering solutions can address issues arising when a solution is not evident during the initial development stages in the multidisciplinary area. This book presents the proceedings of RDECS 2022, the 1st international conference on Recent Developments in Electronics and Communication Systems held on 22 and 23 July 2022 at Aditya Engineering College, Surampalem, India. The primary goal of RDECS 2022 was to challenge existing ideas and encourage interaction between academia and industry to promote the sort of collaborative activities involving scientists, engineers, professionals, researchers, and students that play a major role in almost all fields of scientific growth. The conference also aimed to provide an arena for showcasing advancements and research endeavors being undertaken in all parts of the world. A large number of technical papers with rich content describing ground-breaking research from participants from various institutes were submitted for presentation at the conference. This book presents 108 of these papers, which cover a wide range of topics ranging from cloud computing to disease forecasting and from weather reporting to the detection of fake news. Offering a fascinating overview of recent research and developments in electronics and communications systems, the book will be of interest to all those working in the field.

Human-Friendly Robotics 2019 Federica Ferraguti, Valeria Villani, Lorenzo Sabattini, Marcello Bonfè, 2020-02-20. This book covers a wide range of topics related to human robot interaction both physical and cognitive including theories, methodologies, technologies and empirical and experimental studies. The International Workshop on Human Friendly Robotics HFR is an annual meeting that brings together academic scientists, researchers and research scholars to present their latest original findings on all aspects concerning the introduction of robots into everyday life. The growing need to automate daily tasks combined with new robot technologies is driving the development of human friendly robots, i.e. safe and dependable machines that operate in close proximity to humans or directly interact with them in a wide range of contexts. The technological shift from classical industrial robots which are safely kept away from humans in cages to robots that are used in close collaboration with humans is faced with major challenges that need to be overcome. The objective of the workshop was to stimulate discussion and exchange knowledge on design, control, safety and ethical issues concerning the introduction of robots into everyday life. The 12th installment was organized by the University of Modena and Reggio Emilia and took place in Reggio Emilia, Italy.
