Water, Rhetoric, and Social Justice Theresa R. Castor, Casey R. Schmitt, Christopher S. Thomas, 2020-01-20 Water Rhetoric and Social Justice A Critical Confluence examines how individuals and communities have responded on a global scale to present day water crises as matters of social justice through oratory mass demonstration deliberation testimony and other rhetorical appeals This book applies critical communication methods and perspectives to interrogate the pressing yet mind boggling dilemma currently faced in environmental studies and policy that clean water the very stuff of life which flows freely from the tap in affluent areas is also denied to huge populations materially and fluidly exemplifying the currents of justice liberty and equity Contributors highlight discourse and water justice movements in nonofficial spheres from activists artists and the grassroots In extending the technical economic moral and political conversations on water justice this collection applies special focus on the novel rhetorical concepts and responses not necessarily unique to but especially enacted in water justice situations Scholars of rhetoric sociology activism communication and environmental studies will find this book particularly useful

Nordic Contributions in IS Research Margunn Aanestad, Tone Bratteteig, 2013-07-29 This book contains the refereed proceedings of the 4th Scandinavian Conference on Information Systems SCIS held in Oslo Norway in August 2013 Participants were invited to discuss experiences of digital living within a multitude of empirical settings covering questions like e g how do people relate to each other when interaction is mediated through social networks or what are the societal effects of ICT becoming ubiquitous in everyday situations The 6 papers accepted for presentation at the conference were selected from 18 submissions and address digital living from different perspectives

Sustainability Citizenship in Cities Ralph Horne, John Fien, Beau B. Beza, Anitra Nelson, 2016-04-28 Urban sustainability citizenship situates citizens as social change agents with an ethical and self interested stake in living sustainably with the rest of Earth Such citizens not only engage in sustainable household practices but respect the importance of awareness raising discussion and debates on sustainability policies for the common good and maintenance of Earth s ecosystems Sustainability Citizenship in Cities seeks to explain how sustainability citizenship can manifest in urban built environments as both responsibilities and rights

Contributors elaborate on the concept of urban sustainability citizenship as a participatory work in progress with the aim of setting its practice firmly on the agenda. This collection will prompt practitioners and researchers to rethink contemporary mobilisations of urban citizens challenged by various environmental crises such as climate change in various socio-economic settings. This book is a valuable resource for students, academics and professionals working in various disciplines and across a range of interdisciplinary fields such as urban environment and planning, citizenship as practice, environmental sociology, contemporary politics and governance, environmental philosophy, media and communications and human geography.

Climate Refugees Simon Behrman, Avidan Kent, 2022-03-17 A discussion of cutting edge developments in policy on climate change and forced displacement from leading academics and practitioners.

[The Microbial Regulation of Global Biogeochemical Cycles](#) Johannes Rousk, Per Bengtson, 2014-10-17 Global biogeochemical cycles of carbon and nutrients are increasingly affected by human activities. So far, modeling has been central for our understanding of how this will affect ecosystem functioning and the biogeochemical cycling of carbon and nutrients. These models have been forced to adopt a reductive approach built on the flow of carbon and nutrients between pools that are difficult or even impossible to verify with empirical evidence. Furthermore, while some of these models include the response in physiology, ecology and biogeography of primary producers to environmental change, the microbial part of the ecosystem is generally poorly represented or lacking altogether. The principal pool of carbon and nutrients in soil is the organic matter. The turnover of this reservoir is governed by microorganisms that act as catalytic converters of environmental conditions into biogeochemical cycling of carbon and nutrients. The dependency of this conversion activity on individual environmental conditions such as pH, moisture and temperature has been frequently studied. On the contrary, only rarely have the microorganisms involved in carrying out the processes been identified and one of the biggest challenges for advancing our understanding of biogeochemical processes is to identify the microorganisms carrying out a specific set of metabolic processes and how they partition their carbon and nutrient use. We also need to identify the factors governing these activities and if they result in feedback mechanisms that alter the growth activity and interaction between primary producers and microorganisms. By determining how different groups of microorganisms respond to individual environmental conditions by allocating carbon and nutrients to production of biomass, CO₂ and other products, a mechanistic as well as quantitative understanding of formation and decomposition of organic matter and the production and consumption of greenhouse gases can be achieved. In this Research Topic supported by the Swedish research councils programme Biodiversity and Ecosystem Services in a Changing Landscape BECC, we intend to promote this alternative framework to address how cycling of carbon and nutrients will be altered in a changing environment from the first principle mechanisms that drive them, namely the ecology, physiology and biogeography of microorganisms and on up to emerging global biogeochemical patterns. This novel and unconventional approach has the potential to generate fresh insights that can open up new horizons and stimulate rapid conceptual development in our basic

understanding of the regulating factors for global biogeochemical cycles The vision for the research topic is to facilitate such progress by bringing together leading scientists as proponents of several disciplines By bridging Microbial Ecology and Biogeochemistry connecting microbial activities at the micro scale to carbon fluxes at the ecosystem scale and linking above and belowground ecosystem functioning we can leap forward from the current understanding of the global biogeochemical cycles **The Human and Environmental Impact of Fracking** Madelon L. Finkel, 2015-03-24 Fracking for gas trapped in shale could be a game changer in the quest to find alternatives to dirty fossil fuels but it also has potential for harm This book provides one stop shopping for everyone who wants to know more about the issues Oil and gas account for a large percentage of the world's energy consumption and the search for new ways to extract both from the earth is a global quest Fracking is viewed as an energy game changer but is a controversial topic about which there is much misunderstanding This unbiased work was written to bring clarity to the issues Under the guidance of an internationally recognized public health expert this book provides a comprehensive look at unconventional natural gas development from many different perspectives Written for the layperson the book dispels myths surrounding fracking corrects misconceptions and offers impartial scientifically based information on both benefits and challenges Readers will learn about the effects fracking has on the environment our water air and climate as well as on human and animal health The contributors also look at the economics of fracking and at its socioeconomic impact on local communities and nations They discuss legal and ethical issues related to the practice and in keeping with the intent to provide a fair and balanced overview share the industry perspective as well

Sustainable Agriculture I contains the first part of everything you need to stay up to date on sustainable agriculture Australian National Bibliography: 1992 National Library of Australia, 1988 **Reshaping HR** Julie Hodges, Mark Crabtree, 2020-12-16 The aim of this book is to explore the contribution HR can make to how organizations enact change within the context of an environment of increasing complexity driven by global forces for change In particular the book

focuses on the role of HR in creating value for organizations and engaging stakeholders during transformations. This aim is achieved in several distinct ways. First, a critical perspective is provided of the role of HR in organizational change by examining evidence-based theories, models, and frameworks. Second, the book is grounded in empirical evidence from a study conducted by the authors amongst managers and HR professionals across the globe. This provides unique data on the challenges and opportunities which the practice of HR faces within the context of organizational change. Third, consideration is given as to how HR can play an active and constructive role in co-creating sustainable change with managers, employees, and other stakeholders. Fourth, the book identifies the capabilities required by HR professionals in order to engage effectively with organizational change. Finally, aware of the dangers of prescriptive lists, the HR practices offered in this book are provided as a basis for amendment as necessary by readers depending upon the context of individual organizations. The book will be of value to practising HR professionals as well as students studying HRM and change and development in organizations. Our proposal in this book is that since people are of significant importance to the success of change and HR knowledge and expertise is vital to the experience and engagement of individuals and teams internal and external to the organization, there needs to be clarity about the role of HR in transformations. We suggest that HR's *raison d'être* is to focus on the people aspect of organizational change and that this needs to be done within the context of improving organizational effectiveness and wellbeing.
