**Democracy's Edge** Frances Moore Lappe, 2005-10-28 Three out of five Americans both Republicans and Democrats feel our country is headed in the wrong direction America is at the edge a critical place at which we can either renew and revitalize or give in and lose that most precious American ideal democracy and along with it the freedom fairness and opportunities it assures Democracy's Edge is a rousing battle cry that we can and must act now From Jefferson to Eisenhower presidents from both parties have warned us of the danger of letting a closed narrow group of business and government officials concentrate power over our lives Yet today a small and unrepresentative group of people is making vital decisions for all of us But this crisis is only a symptom Lapp argues It's a symptom of thin democracy something done to us or for us not by or with us Such democracy is always at risk of being stolen by private interests or extremist groups left and right But there is a solution The answer says Lapp is Living Democracy a powerful yet often invisible citizens revolution surging in communities across America It's not random disjointed activism but the emergence of a new historical stage of democracy in which Americans realize that democracy isn't something we have but something we do Either we live it or lose it says Lapp

**Smart Economics** Michael Walden,2005-08-30 Budget deficits gas prices health care costs social security job security Anxiety over the economy pervades our daily lives from reports on the early morning newscasts to gossip around the water cooler to dinner table debate Yet most citizens are woefully ignorant when it comes to understanding how the economy works and how to interpret the impact of policies and business decisions It s easy to slip into generalities government spending is wasteful taxes are too high good paying jobs are being shipped overseas Americans don t save enough Other

issues become hijacked by political partisans to advance their agendas trade must be fair tax cuts will pay for themselves there will be no money left in the social security till after the baby boomers loot it In Smart Economics Michael Walden provides an antidote take 50 of today s top economic issues and explain their meaning implications and potential solutions in a logical straightforward commonsense and non partisan way Has Government Spending Been Out of Control Is Profit Bad Walden applies basic economic concepts and logical argumentation to help readers get their bearings to separate fact from fiction and ultimately make better economic decisions themselves The result is an entertaining and highly informative introduction to economic principles and their influence on our behavior In Smart Economics Michael Walden provides an antidote take 50 of today s top economic issues and explain their meaning implications and potential solutions in a logical straightforward commonsense and non partisan way From Has Government Spending Been out of Control to Is Profit Bad to Why Are Pro Sports Stars Paid So Much Walden demystifies the dismal science using basic concepts and logical argumentation to help readers get their bearings to separate fact from fiction and ultimately make better decisions when it comes to spending investing saving and voting The result is an entertaining and informative introduction to economic principles and their influence on our behavior Economic Logic Third Edition Mark Skousen,2008-05-05 They said it couldn t be done Austrian economics is so different they said that it couldn t be integrated into standard neo classical textbooks Consequently college students learn nothing about the great Austrian economists Mises Hayek Schumpeter Professor Mark Skousen s Economic Logic aims to change that Based on his popular course taught at Columbia University Skousen starts his micro section with Carl Menger s theory of the good and the profit and loss income statement to explain the dynamics of the market process entrepreneurship and the advantages of saving **The Political Economy of Automotive Industrialization in East Asia** Richard F. Doner,Gregory W. Noble,John Ravenhill,2021-04-21 East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand s success as an assembly hub for foreign automakers and China s unexpected achievements in building its own car industry to South Korea s impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world s most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of

China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth
