

Official McDonald's Employee Training Manual

Menu Overview:

Hello, and welcome to the McDonald's family! Here at McDonald's, in order to maximize efficiency and customer satisfaction, we have standardized our menu to include only one item for you to make: the burger.

The burger is the fastest sandwich to ever be invented—it is always swallowed whole. Nothing but the burger is to ever be served at McDonald's.

Food Preparation:

Now that you're a full-fledged McDonald's employee, you'll be cooking your burgers in 30 seconds or less. Yes! Within this time period, you will be required to find a cow, destroy the cow, cook the destroyed cow, and finally, place the cooked cow's meat on a bun and serve it to the customer.

How To Make A McDonald's Burger:

STEP 1: Turn on griddle.

STEP 2: Destroy cow.

STEP 3: Check time.

STEP 4: Serve on bun.

STEP 5: Turn off griddle.

Per company policy, no matter how many of these steps are completed at the 30-second mark, employees must serve what they have made when their time is up. Sometimes this means you will serve a completed burger, and sometimes this means you will simply serve a partially destroyed cow. Both ways are correct.

And, as always, if the customer should take more than 10 seconds to swallow their burger, they will be removed from the restaurant.

Franchise Opportunities Handbook , 1991-06 **Summary of Nick Van Dam's The E-Learning Fieldbook** Everest Media, 2022-03-01T21:00:00Z Please note This is a companion version not the original book Sample Book Insights 1 In 1996 the first article on Internet based training was published in Training Magazine That year the e learning market grew from a few million dollars to 3 4 billion worldwide But in 2002 the stock market crashed and the e learning industry experienced a trough of disillusionment 2 The last event in the time flow is the merger in the e learning industry between SmartForce and SkillSoft in 2002 This merger created the largest global e learning vendor and it is viewed by CLO magazine as the beginning of the trend toward Enlightenment and Productivity 3 Today e learning has proved itself to be a credible opportunity and approach to learning though it has been hurt by some less than stellar implementations Many believe that there is no doubt about the importance of applying e learning when and where it adds value 4 E learning has proven to have a significant business impact as you will find in Chapter 2 of this Fieldbook Many organizations have successfully implemented e learning initiatives that were well aligned with specific business goals *Cockpit Resource Management* Earl L. Wiener, Barbara G. Kanki, Robert L. Helmreich, 1995-11-17 Cockpit Resource Management CRM has gained increased attention from the airline industry in recent years due to the growing number of accidents and near misses in airline traffic This book authored by the first generation of CRM experts is the first comprehensive work on CRM Cockpit Resource Management is a far reaching discussion of crew coordination communication and resources from both within and without the cockpit A valuable resource for commercial and military airline training curriculum the book is also a valuable reference for business professionals who

are interested in effective communication among interactive personnel Key Features Discusses international and cultural aspects of CRM Examines the design and implementation of Line Oriented Flight Training LOFT Explains CRM LOFT and cockpit automation Provides a case history of CRM training which improved flight safety for a major airline **Manual of Simulation in Healthcare** Richard H. Riley, 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anaesthesia **Air Transport and Operations** Lori Fischer, David Pérez, Kurt Klein, Jacco Hoekstra, P. Roling, 2012-10-15 Air transport must evolve if it is to optimize its value in the 21st century The mood in the aerospace industry is positive with regard to economic recovery but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities This book presents the proceedings of the joint conference held in Delft the Netherlands in June 2012 incorporating the 3rd International Air Transport Operations Symposium ATOS the 3rd Association of Scientific Development in Air Traffic Management in Europe ASDA Seminar the 6th International Meeting for Aviation Products Support Processes IMAPP and the 2012 Complex World Seminar The conference brought together over 200 participants from industry and academia all of whom share the common goal of improving performance and capacity by advancing the efficiency sustainability and safety of air transport Presentations at the conference were divided equally between academic papers and more applied industry sessions The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport *Fast Food, Fast Talk*

Robin Leidner,1993-08-04 Attending Hamburger University Robin Leidner observes how McDonald's trains the managers of its fast food restaurants to standardize every aspect of service and product Learning how to sell life insurance at a large midwestern firm she is coached on exactly what to say how to stand when to make eye contact and how to build up Positive Mental Attitude by chanting I feel happy I feel terrific Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers language looks attitudes ideas and demeanor Her study reveals the complex and often unexpected results that come with the routinization of service work Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers Combined Insurance goes further than McDonald's in attempting to standardize the workers very selves instilling in them adroit maneuvers to overcome customer resistance The routinization of service work has both poignant and preposterous consequences It tends to undermine shared understandings about individuality and social obligations sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture Richly anecdotal and accessibly written Leidner's book charts new territory in the sociology of work With service sector work becoming increasingly important in American business her timely study is particularly welcome
