Minds Online Michelle D. Miller, 2014-10-20 From wired campuses to smart classrooms to massive open online courses MOOCs digital technology is now firmly embedded in higher education But the dizzying pace of innovation combined with a dearth of evidence on the effectiveness of new tools and programs challenges educators to articulate how technology can best fit into the learning experience Minds Online is a concise nontechnical guide for academic leaders and instructors who seek to advance learning in this changing environment through a sound scientific understanding of how the human brain assimilates knowledge Drawing on the latest findings from neuroscience and cognitive psychology Michelle Miller explores how attention memory and higher thought processes such as critical thinking and analytical reasoning can be enhanced through technology aided approaches The techniques she describes promote retention of course material through frequent low stakes testing and practice and help prevent counterproductive cramming by encouraging better spacing of study Online activities also help students become more adept with cognitive aids such as analogies that allow them to apply learning across situations and disciplines Miller guides instructors through the process of creating a syllabus for a cognitively optimized fully online course She presents innovative ideas for how to use multimedia effectively how to take advantage of learners existing knowledge and how to motivate students to do their best work and complete the course For a generation born into the Internet age educational technology designed with the brain in mind offers a natural pathway to the pleasures and rewards of deep learning

Designing Effective Distance and Blended Learning Environments in K-12 Driscoll

III, Thomas F.,2021-11-12 It has quickly become apparent in the past year that online learning is not only an asset but it is critical to the continued education of youth during times of crisis However districts and schools across the nation are in need of guidance and practical research backed approaches to distance and hybrid learning The current COVID 19 crisis has demonstrated that effective learning in K 12 is possible but many districts struggled and continue to struggle in achieving that reality There is also the growing consensus that even if things return to normal distance and blended learning strategies should continue to be employed in many ways across the K 12 environment Designing Effective Distance and Blended Learning Environments in K 12 provides key insights into the ways that school districts and educators from across the world have effectively designed and implemented distance and blended learning approaches to enable and enhance student learning The diverse collection of authors from various demographics and roles in school systems will benefit readers across a wide spectrum of school community stakeholders There will also be an emphasis on how research and theory is put into practice along with an honest discussion of what strategies and actions were successful as well as those that were less so This book is essential for professionals and researchers working in the field of K 12 education particularly superintendents curriculum developers professional learning designers school principals instructional technology specialists and teachers as well as administrators researchers academicians and students interested in the effective practices being used in blended learning approaches Library of Congress Catalog: Motion Pictures and Filmstrips Library of Congress,1968 Food and Nutrition Information and Educational Materials Center catalog Food and Nutrition Information Center (U.S.),1976

Susman,2015-06-30 For nearly a decade scientists educators and policy makers have issued a call to college biology professors to transform undergraduate life sciences education As a gateway science for many undergraduate students biology courses are crucial to addressing many of the challenges we face such as climate change sustainable food supply and fresh water and emerging public health issues While canned laboratories and cook book approaches to college science education do teach students to operate equipment make accurate measurements and work well with numbers they do not teach students how to take a scientific approach to an area of interest about the natural world Science is more than just techniques measurements and facts science is critical thinking and interpretation which are essential to scientific research Discovery Based Learning in the Life Sciences presents a different way of organizing and developing biology teaching

laboratories to promote both deep learning and understanding of core concepts while still teaching the creative process of science In eight chapters the text guides undergraduate instructors in creating their own discovery based experiments The first chapter introduces the text delving into the necessity of science education reform The chapters that follow address pedagogical goals and desired outcomes incorporating discovery based laboratory experiences realistic constraints on such lab experiments model scenarios and alternate ways to enhance student understanding The book concludes with a reflection on four imperatives in life science research climate food energy and health and how we can use these laboratory experiments to address them Discovery Based Learning in the Life Sciences is an invaluable guide for undergraduate instructors in the life sciences aiming to revamp their curriculum inspire their students and prepare them for careers as educated global citizens

Food and Nutrition Information and Educational Materials Center Catalog Food and Nutrition Information and Educational Materials Center (U.S.),1973 **The American Biology Teacher** ,1999 **The Spiritual Scientist** Maria Afentakis,2020-04-06 The Spiritual Scientist bridges the gap between science and spirituality to give the reader an understanding of how energy works and how one can balance and restore their energies to have a tranquil and peaceful life The book covers the scientific concepts of energy and the human body and relates these concepts to their spiritual aspects The scientific concepts will be written in an accurate and a simple fashion so the reader will be able to understand these concepts without having a high degree of scientific knowledge The book will discuss the scientific concept first then relate these to the spiritual aspect The first chapter is an introduction to what energy is in basic terms with equations and diagrams so the reader can fully understand that every living thing has its own unique energy Chapter 2 will describe energetic aura in detail as this is very important for the reader to fully understand as the book will focus on spiritual practices that can be used to balance and restore energetic aura including the chakra system Chapter 3 will describe the basic anatomy of the human body and will describe the basic fundamental structures such as a cell and DNA as well as organs and bodily systems including the endocrine system Chapter 4 will focus on the 13 chakras in the body The 13 chakras are represented in the spiritual scientist s logo This chapter will help the reader understand the different chakras in the body and identify when there is a problem or if chakra is inactive overactive or imbalanced Chapters 5 7 will describe specific spiritual practices including crystal healing and aromatherapy that can be incorporated to ground balance and restore ones chakras Chapter 8 will describe the basic function and structure of the brain and how mindfulness techniques including meditations can be used to restore peace and tranquility in ones everyday life The final chapter will be a guided step by step protocol combining all the knowledge learnt throughout the book to create their own meditation kits to balance specific auras Throughout the book there will be guided meditations and activities so the reader will find it easier to understand the importance of these spiritual practices and incorporate them into everyday life **Distance Learning** Michael Simonson,2023-09-01 Distance Learning is for leaders practitioners and decision makers in the fields of distance learning
