## **Google Terms Of Service Change:**

**Google and the Law** Aurelio Lopez-Tarruella, 2012-02-23 Google s has proved to be one of the most successful business models in today s knowledge economy Its services and applications have become part of our day to day life However Google has repeatedly been accused of acting outside the law in the development of services such as Adwords Googlebooks or YouTube One of the main purposes of this book is to assess whether those accusations are well founded But more important than that this book provides a deeper reflection are current legal systems adapted to business models such as that of Google or are they conceived for an industrial economy Do the various lawsuits involving Google show an evolution of the existing legal framework that might favour the flourishing of other knowledge economy businesses Or do they simply reflect that Google has gone too far What lessons can other knowledge based businesses learn from all the disputes in which Google has been or is involved This book is valuable reading for legal practitioners and academics in the field of information technologies and intellectual property law economists interested in knowledge economy business models and sociologists interested in internet and social networks Dr Aurelio Lopez Tarruella is Senior Lecturer in Private International Law at the University of Alicante Spain

**Regulatory Aspects of Artificial Intelligence on Blockchain** Tehrani, Pardis Moslemzadeh, 2021-09-24 The convergence of Artificial Intelligence AI in blockchain creates one of the world s most reliable technology enabled decision making systems that is virtually tamper proof and provides solid insights and decisions The integration of AI and Blockchain affects many aspects from food supply chain logistics and healthcare record sharing to media royalties and financial security It is imperative that regulatory standards are emphasized in order to support positive outcomes from the integration of AI in blockchain technology Regulatory Aspects of Artificial Intelligence on Blockchain provides relevant legal and security frameworks and the latest empirical research findings in blockchain and AI Through the latest research and standards the book identifies and offers solutions for overcoming legal consequences that pertain to the application of AI into the blockchain system especially concerning the usage of smart contracts The chapters while investigating the legal and security issues associated with these applications also include topics such as smart contracts network vulnerability cryptocurrency machine learning and more This book is essential for technologists security analysts legal specialists privacy and data security practitioners IT consultants standardization professionals researchers academicians and students interested in blockchain and AI from a legal and security viewpoint

**Wrap Contracts** Nancy S. Kim, 2013-07-27 When you visit a website check your email or download music you enter into a contract that you probably don t know exists Wrap contracts shrinkwrap clickwrap and browsewrap agreements are non traditional contracts that look nothing like legal documents Contrary to what courts have held they are not just like other standard form contracts and consumers do not perceive them the same way Wrap contract terms are more aggressive and permit dubious business practices such as the collection of personal information and the appropriation of user created content In digital form wrap

contracts are weightless and cheap to reproduce Given their low cost and flexible form businesses engage in contracting mania where they use wrap contracts excessively and in a wide variety of contexts Courts impose a duty to read upon consumers but don't impose a duty upon businesses to make contracts easy to read The result is that consumers are subjected to onerous legalese for nearly every online interaction In *Wrap Contracts Foundations and Ramifications* Nancy Kim explains why wrap contracts were created how they have developed and what this means for society She explains how businesses and existing law unfairly burden users and create a coercive contracting environment that forces users to accept in order to participate in modern life Kim's central thesis is that how a contract is presented affects and reveals the intent of the parties She proposes doctrinal solutions such as the duty to draft reasonably specific assent and a reconceptualization of unconscionability which fairly balance the burden of wrap contracts between businesses and consumers

The Software License Unveiled Douglas E. Phillips,2009-06-01 Millions of computer users regularly bind themselves to software license terms with the click of a mouse usually without reading anything but the word agree Licenses for software as diverse as Microsoft Windows and Linux and terms of use for websites such as Facebook are all subject not only to intellectual property and commercial law but also to the private law of the license which comes in many forms each with its advocates Microsoft for example maintains that its proprietary model gives users the rights they need while creating the incentives that have made the United States the global software leader while Richard Stallman creator of the GNU General Public License and author of a number of free software programs asserts that proprietary licensing enables software companies to hoard software they should be sharing In The Software License Unveiled Douglas Phillips looks at both of these extremes and questions how these proliferating but largely unread license terms affect access to software one of the economy s most valuable resources While highlighting the obvious divergences he makes the more illuminating case that most current models spanning the spectrum from proprietary to free have one key feature in common to an increasing extent each license model extends modifies or displaces public law that would otherwise apply Unlike books that advocate one form of licensing or another this one reframes the debate to propose that going forward a key challenge for lawyers scholars policymakers and the public is to consider whether legislation by license should be the means for controlling software access
