LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. She asked us to write a paper on the lizards we selected and to present our findings to the class.

An adaptation is a structure or function that the organism has as a response to its environment. Give an example of a structure and a function that is an adaptation. Provide one example and an explanation of an adaptation in the lizard lab.

One example of an adaptation is the lizard's ability to change color. This is an adaptation because it helps the lizard blend in with its environment and avoid predators.

Provide one evolutionary adaptation for why lizards have the ability to change color (i.e., the green) would have evolved a function.

One evolutionary adaptation for why lizards have the ability to change color is that it helps them blend in with their environment and avoid predators.
