Entropy and Divergence Measures Leandro Pardo, 2019-05-20 This book presents new and original research in Statistical Information Theory based on minimum divergence estimators and test statistics from a theoretical and applied point of view for different statistical problems with special emphasis on efficiency and robustness Divergence statistics based on maximum likelihood estimators as well as Wald's statistics likelihood ratio statistics and Rao's score statistics share several optimum asymptotic properties but are highly non robust in cases of model misspecification under the presence of outlying observations It is well known that a small deviation from the underlying assumptions on the model can have drastic effect on the performance of these classical tests Specifically this book presents a robust version of the classical Wald statistical test for testing simple and composite null hypotheses for general parametric models based on minimum divergence estimators

HELP: A Dynamic Hospital Information System Gilad J. Kuperman, Reed M. Gardner, T. Allan Pryor, 2013-03-12 This monograph series is intended to provide medical information scientists health care administrators health care providers and computer science professionals with successful examples and experiences of computer applications in health care settings Through the exposition of these computer applications we attempt to show what is effective and efficient and hopefully provide some guidance on the acquisition or design of information systems so that costly mistakes can be avoided The health care industry is currently being pushed and pulled from all directions from the clinical side to increase quality of care from the business side to improve financial stability from the legal and regulatory sides to provide more detailed documentation and in a university environment to provide more data for research and improved opportunities for education Medical information systems sit in the middle of all these demands They are not only asked to provide more better and more timely information but also to interact with and monitor the process of health care itself by providing clinical reminders warnings about adverse drug interactions alerts to questionable treatment alarms for security breaches mail messages workload schedules etc Clearly medical information systems are functionally very rich and demand quick response time and a high level of security They can be classified as very complex systems and from a developer's perspective as risky systems
