Language Network McDougal Littell, 2001 Grade 11 **Language Use in Ethiopia from a Network Perspective**

Ronny Meyer, Renate Richter, 2003 This publication describes the usage of languages in the multilingual society of Ethiopia. It is based on empirical studies conducted in nine states of the Federal Democratic Republic of Ethiopia in 1997 and 1998. A research team of German and Ethiopian scholars surveyed about 3 500 high school students from 35 Ethiopian towns regarding their language behaviour. The data on the distribution of mother tongues and second languages are published here for the first time and are representative for a typical Ethiopian town. These data outline the development of multilingualism over three generations: students, parents, grandparents, and elucidate factors which promote the spread of multilingualism. The frame for the representation and explanation of the data is an adapted model of the social network theory. **SEBI Officer**

Text Answers Robin Richner, 2022-10-14 Teachers spend a great amount of time grading free text answer type questions. To encounter this challenge, an auto grader system is proposed. The thesis illustrates that the auto grader can be approached with simple recurrent and Transformer based neural networks. Hereby, the Transformer based models have the best

performance. It is further demonstrated that geometric representation of question answer pairs is a worthwhile strategy for an auto grader. Finally, it is indicated that while the auto grader could potentially assist teachers in saving time with grading, it is not yet on a level to fully replace teachers for this task.
