M65 Atomic Cannon David Doyle, 2019-09-30 A pictorial history of this powerful piece of artillery an icon of the Cold War era In 1949 the US Army wanted an artillery gun that could fire a nuclear warhead in the event that guided missiles and long range bombers proved insufficient in delivering atomic weapons The result was the M65 280mm Atomic Cannon On May 25 1953 at 0830 hours an M65 of A Battery 867th Field Artillery Battalion let loose with the only nuclear round the type would ever fire Six battalions of the M65 would eventually be deployed most in Europe with one battalion sent to the Korean Peninsula Though never used in combat they served as a significant tactical nuclear deterrent Through historic photos this volume traces the development production and deployment of this iconic piece of military equipment from the drawing boards to the Cold War battlefields of Europe

A Military History of the Cold War, 1944-1962 Jonathan M. House, 2012-11-20 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between

government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House s account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe *US Army gun, heavy, motorized, 280 mm, M65 Atomic Annie* Michael Franz, 2006 **Military Publications** United States.
