A. Barnett,2017-07-05 This comprehensive examination of general education by Daniel Bell scrutinizes the experiences of Columbia College Harvard and The College of the University of Chicago These three basic models of general education in the country are set against a background of social change which includes a detailed analysis of structural changes in American society the universities and the secondary schools and what Bell has called the emerging postindustrial society Bell attacks the distinction between general education and specialism He holds that one must embody and exemplify general education through disciplines and extend the context of specialism by setting it within the methodological grounds of knowledge The common link between the two is the emphasis on conceptual inquiry By emphasizing modes of conceptualization how one knows rather than what one knows Bell insists that colleges can have a new vivifying function between the pressures of the secondary and graduate schools In his proposals for a new curriculum Bell sets forth a scheme that imagines the first year as an acquisition of necessary historical and humanistic knowledge the next two years as training in a discipline and the last year the third tier the most radical innovation as a new kind of general education course which would brake specialization and apply disciplined knowledge to broad intellectual and policy questions     **Madhya Pradesh Higher Secondary Teacher Eligibility Test-2018 English Language 12 Practice Sets** R.K.
