

Wall Locations

The thermostat should be installed approximately 4 to 5 feet above the floor. Select an area with average temperature and good air circulation.

Installation Tip

Pick an installation location that is easy for the user to access. The temperature of the location should be representative of the building.

- Do not install thermostat in locations:**
- Close to hot or cold air ducts
 - That are in direct sunlight
 - With an outside wall behind the thermostat
 - In areas that do not require conditioning
 - Where there are dead spots or drafts
 - In corners or behind doors
 - Where there might be concealed chimneys or pipes

Installation Tips

Mount Thermostat

Align the 4 tabs on the subbase with corresponding slots on the back of the thermostat, then push gently until the thermostat snaps in place.

Battery Installation

Battery installation is recommended even if thermostat is hardwired (C terminal connected). When thermostat is hardwired and batteries are installed, the thermostat will activate a compressor delay of 5 minutes when the thermostat detects a power outage from the hardwired power supply.

Important:

High quality alkaline batteries are recommended. Rechargeable batteries or low quality batteries do not guarantee a 1-year life span.

Simple operation with no wiring. The thermostat is mounted on the back of the battery door.

About The Badge

All of our thermostats use the same universal magnetic badge. Visit the company website to learn more about our free private label program.

Simply slide a standard size coin (the bottom edge of the badge). Gently turn the screwdriver counter clockwise. The badge is held on by a magnet on the wall on the battery door. The badge should pop out easily. Do not use force.

Use the barrel on screw driver
