Cardiovascular Psychophysiology Paul A. Obrist, 2012-12-06 It was my original intention to write a reasonably advanced psycho physiology text that would go beyond cardiovascular activity This I believed would require a collaborative effort since my expertise outside of cardiovascular

psychophysiology is too limited After some initial limited efforts to organize such a venture it became apparent that a text of this nature was not feasible Thus the effort was dropped I did however receive encouragement to write the present monograph which is more a personalized document than a text As will become apparent this monograph relies heavily on research from my laboratory and details the manner in which our conceptualizations of the issues have developed At first I believed such an effort premature since such a personalized document was something one composes upon retirement However I was persuaded by some individuals who shall remain anonymous just in case they end up regretting their actions to undertake the present effort There are several people who have rendered assistance in the preparation of this monograph for whose efforts I am extremely grateful Extensive editorial assistance and encouragement were provided by Kathleen C Light and Alberto Grignolo Also assisting editorially were Ellen Z Curtin Allison Cahill and Carolyn Williams I wish also to thank my long time secretary Virginia Hodson and Jenny Adams for their typing assistance There are six people to whom I would like to dedicate this book
