HISTORY: Documentation of history includes CC, HPI, ROS, and PFH.

- ☐ **Internal History:** Subsequent hospital care only requires documentation of new history since last encounter.
- ☐ **Unstable/Unstable History:** Document reason. For example, "Further history was unstable/unstable because <...>."

EXAMINATION: Document specific abnormal, unexpected, and adverse negative findings. A collection of negative or normal is sufficient for normal findings. Extent of exam documented depends on PP.

MEDICAL DECISION-MAKING: MDPM can be viewed as the outcome of a cognitive process that leads to the selection of a course of action to diagnose or treat a patient. There are 3 distinct components to MDPM: number of problems, data reviewed/ordered, and risk. The first 2 are quantified; risk is up to the health-care professional to determine. To qualify for a given type of MDPM, 2 of the 3 elements must be met or exceeded.

TIME: For visits dominated by counseling or coordinating care, document total face-to-face time (disruptive) or visit flow time (disruptive) and that >50% of total time was dominated by counseling or coordinating care. In less of top components, time can be used to determine L/NP level. >10% was spent counseling and coordinating care. Time is counted only by the reporting health-care professional. Documentation requirements: "I personally spent a total time of <...> minutes in the care of this patient; of that, <...> minutes was spent in counseling and coordinating care face-to-face."
