Psychology and Mathematics Education Gila Hanna, Laura Macchi, Karin Binder, Laura Martignon, Katharina Loibl, 2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive

Psychology and Mathematics Education have been particularly strong during the last decades. Indeed, the Enlightenment view of the rational human mind that reasons, makes decisions, and solves problems based on logic and probabilities was shaken during the second half of the twentieth century. Cognitive psychologists discovered that human thoughts and actions often deviate from rules imposed by strict normative theories of inference. Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats. Humans, as the cognitive psychologist and economist Herbert Simon claimed, do not usually optimize but rather satisfice even when solving problems. This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education. We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program. In Simon's bounded rationality and its direct descendant, ecological rationality, rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content-free norms of coherence, e.g., transitivity.

Reaching Out Diane W. Kyle, Ellen McIntyre, Karen B. Miller, Gayle H. Moore, 2002-07-19. The timing for *Reaching Out* could not have been better. Just when educators are beginning to realize that teachers need training in how to work with parents, Kyle, McIntyre, Miller, and Moore bring us a book that is a welcome breath of fresh air. Patricia A. Edwards, Professor of Language and Literacy at Michigan State University, says *Reaching Out* describes a great variety of ways to respectfully and productively engage families in helping their children learn and grow. Throughout the text, the reader is reminded that parents are experts about their children and that trusting relationships are built on respectful two-way communications. The authors also remind us that the goal of family involvement is not parent participation at school events and activities but improved student achievement. Steve McCafferty, Principal at Mildred Dean School in Newport, KY, says *Reaching Out* describes how to involve families in the education process and enhance your students' learning experience. Too often today's student feels alienated from school and learning suffers as a result. Developing a relationship with the family can provide the missing link in the educational chain. *Reaching Out* is an invaluable resource for compassionate educators interested in building strong relationships with their students' families. A dynamic team of teachers and teacher educators have combined their first-hand experience and in-depth research in this essential guidebook. By involving the entire family in the educational experience, teachers can bridge the gap separating home and school and help produce happier, healthier, and smarter kids. Highlights include: Building trust with families; Communicating in positive ways with students' families; Implementing family workshops; Involving families through innovative homework ideas. Based on a five-year study, the information will be particularly helpful for teachers whose classrooms reflect a diverse student population. By incorporating these concepts and techniques, you not only enhance the learning experience, you also help your students to be more compassionate and excited about school.

Finding Your Leadership Focus Douglas B. Reeves, 2015-04-18. In his new book, author and international keynoter

Douglas Reeves addresses a major challenge faced by today's school leaders: an ever-growing load of programs and initiatives. Reeves contends that program overload not only taxes leadership resources but actually hurts rather than improves student performance. Drawing on recent research findings, this book shows how leaders can pare down from a proliferation of initiatives to determine what is truly most important based on their local concerns, challenges, populations, and other school factors. Identifying a specific set of leadership practices that are more strongly associated with improvements in student achievement, Reeves provides explicit guidelines for how school leaders can improve their most critical leadership decisions by simultaneously engaging in three essential strategies: monitoring teaching and leadership practices, building high degrees of efficacy among staff members, and focusing on a smaller number of priorities. *Finding Your Leadership Focus* is essential reading for new and veteran principals, teacher leaders, and PLC book study groups. Book Features: Practical guidance to help school leaders at every level to focus on what is most important and to assess their progress; Analysis correlating three years of student achievement data and specific school leadership practices; Online video conference support by Douglas Reeves for book study groups and graduate classes who use this book; Online downloads. Douglas B. Reeves is the founder of The Leadership and Learning Center, Englewood, Colorado. He was named the Brock International Laureate for his contributions to education and received the Distinguished Service Award from the National Association of Secondary School Principals. *Finding Your Leadership Focus* could not have arrived at a more timely moment in the history of reform. Doug Reeves' conclusions and agenda for action are exactly what is needed. From the Foreword by Michael Fullan, professor emeritus, University of Toronto. If schools and districts model their improvement efforts on Doug Reeves' sage advice, voluminous strategic plans will be scrapped, trees will be saved, educators will avoid the Law of Initiative Fatigue, and most importantly, students will learn at higher levels. Richard DuFour, educational author and consultant. This book is a masterful combination of research and practice, and Doug Reeves is one of the few people in the country who could have written it. He has added much needed clarity to the process of leading in a way that directly results in enhanced student achievement. Robert J. Marzano, CEO, Marzano Research Laboratory. **Using Rubrics for Performance-Based Assessment** Todd Stanley, 2021-10-03. Writing a rubric that can accurately evaluate student work can be tricky. Rather than a single right or wrong answer, rubrics leave room for interpretation and thus subjectivity. How does a teacher who wants to use performance-based assessment in this day and age of educational data and SMART goals find a way to reliably assess student work? The solution is to write clear rubrics that allow the evaluator to objectively assess student work. This book will show classroom teachers not only how to create their own objective rubrics, which can be used to evaluate performance assessments, but also how to develop rubrics that measure hard-to-assess skills such as leadership and grit, and how to empower their own students to create rubrics that are tailored to their work. **The Exemplary Middle School** Paul S. George, William Marvin Alexander, 2003. *THE EXEMPLARY MIDDLE SCHOOL* has been the standard in the field of middle school education for two

decades Its comprehensive coverage remains unparalleled and the authors have included a multitude of rich real world illustrations of exemplary middle school practice This Third Edition is also the most scholarly resource on middle school education on the market with an impressive research base
