In 2004, Tele2's results were mainly affected by fluctuations in NOK, USD, DML and GBP. ### CURRENCY RISKS

In telephony operations, a currency risk arises in connection with international call traffic, as a liability or a receivable is created between Tele2 companies and foreign operators. In mobile telephony, these transactions are calculated in SGRs (Special Drawing Rights) but are invoiced and paid in Euro.

Currency risks in our international operations are limited by denominating loans to group companies in the subsidiary's local currency.

The five-year loan facility is denominated in USD, SEK, EUR and GBP. The exchange-rate difference which regularly arises in translating the loan liability is offset against the exchange-rate differences which arise in the corresponding net investment in subsidiaries. No hedging is undertaken against other types of currency risk. At December 31, 2004, exchange rate differences after tax of SEK 77 (2003: 71) million relating to loan liabilities were booked directly to shareholders' equity.

## NOTE 24. Number of shares

The share capital in Tele2 AB is divided into two share classes, namely, Class A and B shares. Both share classes have a par value of SEK 5 per share and offer equal participation in the company's net assets and earnings. Class A shares, however, entitle the holder to 50 voting rights per share and Class B shares to one voting right per share.
