## Pilotless Ignition

Your range is equipped with pilotless ignition. With this type of ignition system, the gas automatically shuts off and **the oven will not operate during a power failure.**

**A lighted match will not light the oven burner. No attempt should be made to operate the oven during a power failure.**

## Oven Vent

When the oven is in use the area near the vent may become hot enough to cause burns. Never block the vent opening.

The oven vent is located below the backguard vent shield on your range.

Do not place plastics near the vent opening as heat from the vent could distort or melt the plastic.

## Oven Light

Press the oven light switch to turn the oven light on and off. The oven light is only activated by this switch.

## Oven Bottom

## Oven Racks

### CAUTION

- Do not attempt to change the rack position when the oven is hot.
- Do not use the oven for storing food or cookware.

The oven has two racks. All racks are designed with a lock-stop edge.

### To remove:

1. Pull rack straight out until it stops at the lock-stop position.

2. Lift up on the front of the rack and pull out.

### To replace:

1. Place rack on the rack support in the oven.
2. Tilt the front end up slightly. Slide rack back until it clears the lock-stop position.
