Investigating the Elements of Plant Defense Mechanisms Within Plant Immune Responses Against Pathogens Katarzyna Otulak-Kozieł,Edmund Kozieł ,Jozef Julian Bujarski,2024-11-11 Biotic stress can increase or reduce a plant s susceptibility to specific pathogens A wide range of plant pathogens i e viruses bacteria and fungi causing diseases modulate different elements of plant defense mechanisms responses that influence disease and the physiological state of host plants Nevertheless plant hosts are not static and defenseless Plants have developed active and dynamic complex defense mechanisms to protect themselves against different pathogenic stressors Plants defense mechanisms consist of multi elements and can be determined by pre formed natural barriers or inducible defense responses directly activated upon detection of a pathogen The inducible response is defined as basal resistance or innate immunity and is regulated by signal transduction and transcriptional networks Moreover plant responses to pathogens are finely tuned and complex at the immune receptor cellular proteome epigenetic and transcriptome levels We can tell that a sophisticated molecular arms race is taking place in the biological co evolution of plant pathogen interactions especially in developing novel elements involved in this interaction Therefore a comprehensive understanding of the broad spectrum and underlying elements of defense mechanisms in the interactions between plants and their pathogenic enemies will improve plant resistance to pathogens

Environmental Politics in Egypt Jeannie Sowers,2013-06-26 Drawing on extensive fieldwork conducted in Egypt from the late 1990s to 2011 this book shows how experts and activists used distinctive approaches to influence state and firm decision making in three important environmental policy domains

These include industrial pollution from large scale industry the conservation of threatened habitat and water management of the irrigation system These cases show how environmental networks sought to construct legal discursive and infrastructural forms of authority within the context of a fragmented state apparatus and a highly centralized political regime Managerial networks composed of environmental scientists technocrats and consultants sought to create new legal regimes for environmental protection and to frame environmental concerns so that they would appeal to central decision makers Activist networks in contrast emerged where environmental pollution or exclusion from natural resources threatened local livelihoods and public health These networks publicized their concerns and mobilized broader participation through the creative use of public space media coverage and strategic use of existing state sanctioned organizations With the increased popular mobilization of the 2000s and the mass protests of the 2011 revolution environmental politics has become highly topical Expert and activist networks alike have sought to broaden their appeal and diversify their approaches The result may well be a more contested participatory and dynamic phase in Egyptian environmentalism

Food Industry Wastes Maria R. Kosseva,Colin Webb,2013-01-31 Food Industry Wastes Assessment and Recuperation of Commodities presents emerging techniques and opportunities for the treatment of food wastes the reduction of water footprint and creating sustainable food systems Written by a team of experts from around the world this book provides a guide for implementing bioprocessing techniques It also helps researchers develop new options for the recuperation of these wastes for community benefit More than 34 million tons of food waste was generated in the United States in 2009 at a cost of approximately 43 billion And while less than three percent of that waste was recovered and recycled there is growing interest and development in recovering and recycling food waste These processes have the potential not only to reduce greenhouse gases but to provide energy and resources for other purposes This book examines these topics in detail starting with sources characterization and composition of food wastes and development of green production strategies The book then turns to treatment techniques such as solid state fermentation and anaerobic digestion of solid food waste for biogas and fertilizer A deep section on innovative biocatalysts and bioreactors follows encompassing hydrogen generation and thermophilic aerobic bioprocessing technologies Rounding out the volume are extensive sections on water footprints including electricity generation from microbial fuel cells MFCs and life cycle assessments Food waste is an area of focus for a wide range of related industries from food science to energy and engineering Outlines the development of green product

strategies International authoring team represents the leading edge in research and development Highlights leading trends of current research as well as future opportunities for reusing food waste

Decentralization and Health Policy in South Asia Nisha Bellinger, 2024-09-02 This ambitious and insightful book provides a unique regional perspective on health policy across South Asia focusing on how the decentralization of policy and governance leads to differing health outcomes across different countries in the region Comparing the contexts and outcomes in Sri Lanka Pakistan India Nepal and Bangladesh the book asks how power sharing arrangements between central and subnational layers of government nevertheless result in varying levels of success across issues such as infant and under five mortality rates The book argues that it is the role of central government in formulating policy and how this feeds into regional implementation that partly explains the disparities in health outcomes across the region The book will interest students and scholars of South Asia politics global health and health policy more generally
