Paper 1 Example (3 SAQs & 1 ERQ)

Answer all questions in this section. Marks will be awarded for focused answers supported by relevant knowledge and study.

1. Describe neuroplasticity, with reference to one study. [9 marks]

Neuroplasticity is the brain's ability to change in response to environmental demands. This occurs through neuronal unmasking and neural pruning. Neuronal unmasking is when the brain activates dormant neurons and strengthens them through practice, which increases neuronal density in the areas of the brain with recent patterns of activity. Long-term potentiation is the term used for the strengthening of neural networks through recent patterns of activity in specific regions of the brain that cause a long-lasting increase in signal transmission in those regions and this explains how the brain structure changes as a result of environmental demands. However, a lack of activity in neural networks leads to the weakening and the elimination of these networks which is known as neural pruning. Many studies have investigated neuroplasticity in action, namely Maguire et al. (2000) which investigated whether structural changes were evident in the brains of people with extensive experience in spatial navigation.

The study compared MRI scans of 16 right-handed male taxi drivers in London that have all been driving for at least 1.5 years to the MRI scans of 50 right-handed males from the London Hospital who were not taxi drivers. The mean age did not differ between the experimental group and the control group. They found that the taxi drivers had increased grey matter in the hippocampal areas as compared to the control group which suggests that the hippocampus plays a role in spatial navigation. Furthermore, they found that the taxi drivers had larger posterior hippocampi than the control group, whilst the control group had larger anterior hippocampus than the taxi drivers. This demonstrates long-term potentiation occurring in the taxi drivers' posterior hippocampi. Since, the taxi drivers use their spatial navigation skills frequently, the recent activity in the posterior hippocampus leads to the strengthening of the neural networks in that region which increases the neural density and is evident through the larger volume of the posterior hippocampus in the taxi drivers. Moreover, a positive correlation between the number of years driving and the volume of the posterior hippocampus was discovered, which creates a direct link between increased use of spatial navigation skills and the volume of that region. This further demonstrates the effects of long-term potentiation on brain structure and, therefore, the relationship between brain structure and environmental demands. They concluded that the structural changes were evident in the brains of the taxi drivers, with extensive experience in spatial navigation and the findings of this study act as evidence for neuroplasticity as the changes in the volume of the posterior hippocampus (a change in the structure of the brain) is shown to be impacted by the experience in spatial navigation (the environmental demand).

Feedback:

Excellent links made.

You described two specific parts of neuroplasticity, but not what it is in general.

The Top Books of the Year Ib Psychology Sl Specimen Paper 2013 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
