Multimodal Safety Management and Human Factors José M. Anca Jr,2017-05-15 Safety management and human factors disciplines are often regarded as subjective and nebulous This perhaps stems from a variety of sometimes disparate activities in the realms of education industry and research Aviation is one of the safety critical industries that has led the development of safety systems and human factors However in recent years safety management and human factors are seen to be progressing well in the road rail and the medical arena Multimodal Safety Management and Human Factors is a wide ranging compendium of contemporary approaches in the aviation road rail and medical domains It brings together 28 chapters from both the academic and professional worlds that focus on applications tools and strategies in safety management and human factors It is a wellspring of the practical rather than the theoretical Safety scientists human factors industry practitioners change management advocates educators and students will find this book extremely relevant and challenging **Flying in the Face of Criminalization** Sofia Michaelides-Mateou,Andreas Mateou,2016-04-15 Two parallel investigations take place after every aviation accident one technical one judicial The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents The judicial investigation however has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability Consequently this results in a predicament for those parties that have been identified as having played a role in the accident a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and on the other hand supplying such information which may possibly be used against them in subsequent criminal prosecution The situation is compounded by inconsistent approaches between different legal systems aviation professionals may find themselves faced with criminal charges in one country but not in another and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law Aviation safety is to a large extent built upon the trust placed by pilots ATCOs and other aviation professionals in the process of accident investigation This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety **The Elgar Companion to the Law and Practice of the International Civil Aviation Organization** Ludwig Weber,Joseph Wilson,2025-06-09 This comprehensive Companion presents a unique overview of the law and practice of the International Civil Aviation Organization ICAO It explores the organization s indispensable role in the formulation and implementation of rules policies standards and recommended practices across the 193 member States addressing major challenges such as fostering aviation safety and security reducing emissions upgrading air navigation services and protecting the flying public against cyber threats
