Michael Faraday Walter Jerrold,2018-09-20 Reproduction of the original Michael Faraday by Walter Jerrold Michael Faraday Walter Copeland Jerrold,2017-07-28 Michael Faraday FRS September 22 1791 August 25 1867 was an English scientist who contributed to the study of electromagnetism and electrochemistry His main discoveries include the principles underlying electromagnetic induction diamagnetism and electrolysis Although Faraday received little formal education he was one of the most influential scientists in history It was by his research on the magnetic field around a conductor carrying a direct current that Faraday established the basis for the concept of the electromagnetic field in physics Faraday also established that magnetism could affect rays of light and that there was an underlying relationship between the two phenomena He similarly discovered the principles of electromagnetic induction and diamagnetism and the laws of electrolysis His inventions of electromagnetic rotary devices formed the foundation of electric motor technology and it was largely due to his efforts that electricity became practical for use in technology *Michael Faraday* Walter Jerrold,1893
