Chemical Process Equipment - Selection and Design (Revised 2nd Edition) James R. Couper, W Roy Penney, James R. Fair PhD, 2009-08-11

A facility is only as efficient and profitable as the equipment that is in it this highly influential book is a powerful resource for chemical process or plant engineers who need to select design or configure plant successfully and profitably It includes updated information on design methods for all standard equipment with an emphasis on real world process design and performance The comprehensive and influential guide to the selection and design of a wide range of chemical process equipment used by engineers globally Copious examples of successful applications with supporting schematics and data to illustrate the functioning and performance of equipment Revised edition new material includes updated equipment cost data liquid solid and solid systems and the latest information on membrane separation technology Provides equipment rating forms and manufacturers data worked examples valuable shortcut methods rules of thumb and equipment rating forms to demonstrate and support the design process Heavily illustrated with many line drawings and schematics to aid understanding graphs and tables to illustrate performance data

Supply Planning for Processors of Agricultural Raw Materials Susanne Wiedenmann, 2013-12-13

Renewable resources are rapidly gaining importance as alternative raw materials for industrial production Supply planning with agricultural raw materials poses several challenges to processors These challenges include seasonal availability uncertain harvest quality and quantity as well as uncertain commodity market prices In this work decision support based on stochastic programming is developed to optimize supply planning of processors of agricultural raw materials given industrial requirements for material use The approach depicts uncertain parameter values with probability distributions and maximizes the expected profit Two examples are used to illustrate possible applications supply planning for a processor of linseed and for a seed company As stochastic programs can be adapted quickly this approach can be applied to other supply planning decisions in bio based supply chains
