untangles topics from their Soviet reference frame. It aims to de-exoticize the region and draws parallels to European or to historically European occupied territories. In each chapter the handbook provides a concise but nuanced overview of the topics covered in which way these have been approached by the mainstream literature and points out pitfalls, myths and new insights providing background knowledge about Central Asia to readers and intertwine this with an advanced level of insight to leave the readers equipped with a strong foundation to approach more specialized sources either in classroom settings or by self study. In addition the book offers a comprehensive glossary, list of used abbreviations, overview of intended learning outcomes and a smart index distinguishing between names, locations, concepts and events. A list of recorded lectures to be found on YouTube will accompany the handbook either as instruction materials for teachers or visual aids for students. Since the authors themselves recorded the lectures related to their own chapters this provides the opportunity to engage in a more personalized way with the authors.
