 increased throughout the industry in recent years Mathematical optimization based on mixed integer programming has  
 brought about the superstructure optimization method for synthesizing petroleum refinery configurations from multiple  
 topological alternatives Model Based Optimization for Petroleum Refinery Configuration Design presents a detailed  
 introduction to the use of mathematical optimization to solve both linear and nonlinear problems in the refining industry The  
 book opens with an overview of petroleum refining processes basic concepts in mathematical programming and applications  
 of mathematical programming for refinery optimization Subsequent chapters address superstructure representations of
