Sustainable Value Creation in the Fine and Speciality Chemicals Industry R. Rajagopal, 2014-06-12. The global fine and speciality chemicals industry is a vital segment within the chemical value chain catering to a multitude of societal and industrial needs. Regulatory sustainability and consumer forces have been constantly shaping the business fundamentals of this industry. Developing value creation strategies which embed economic, environmental and social sustainability components will need a comprehensive assessment of business, scientific and technological challenges facing the industry. *Sustainable Value Creation in the Fine and Speciality Chemicals Industry* assesses sustainable value creation options against the backdrop of global mega trends that are defining the present and future course of the industry. It discusses innovative strategies in feedstocks, R D technology, manufacturing, resource management and the supply chain as well as the significance of the bio based chemical economy in enabling sustainable value creation in the fine and speciality chemicals industry. Topics covered include Transformation in the fine and speciality chemicals business, Sustainable management, evolution, transitions and tools, Research and technology directions, Resource optimization strategies, Bio based chemicals, specialities and polymers, Sustainable practices in the fine and speciality chemicals industry, Sustainable value creation strategies. *Sustainable Value Creation in the Fine and Speciality Chemicals Industry* presents a comprehensive overview of strategic options for sustainability management in the global fine and speciality chemicals industry. It will be a valuable resource for chemists and chemical engineers involved in the design and development of economically, environmentally and socially sustainable practices for the future.

The Economic Dynamics of Modern Biotechnology Maureen D. McKelvey, Annika Rickne, Jens Laage-Hellman, 2004-01-01. All would agree that with more than 3 000 new firms formed in Europe, Japan and the United States focused on biotechnology and with elegant strides forward in our understanding of genetics, the genome, proteomics and other related fields, a true intellectual, social and industrial revolution is in the making. Maureen McKelvey et al provide fascinating data on firm formation, case studies of emerging business models and cross regional and national comparisons. The work is a useful beginning in our understanding of an emerging phenomenon. James M Utterback, Massachusetts Institute of Technology, US. This book offers a novel insight into the economic

dynamics of modern biotechnology using examples from Europe to reflect global trends The authors apply theoretical insight to a fundamental enigma of the modern learning society namely how and why the development of knowledge and ideas interact with market processes and the formation of industries and firms
