Industrial Engineering in Apparel Manufacturing Dr. Prabir Jana, Dr. Manoj Tiwari ,2020-03-11 While there is pressure from buyers inclination within self to do better and a heightened aspiration among apparel manufacturers to use Industrial Engineering IE like other more industrialized sectors there is no specific book as such dealing with IE in relation to apparel manufacturing The existing books that are already written on IE possess academic rigour and generic functions applicable across industries thus making it difficult for the practitioners to refer and clear discrete doubts related to apparel manufacturing Undoubtedly work study is the centrepiece of Industrial Engineering however apart from work study industrial engineers in apparel industry are also supposed to perform various other functions like preparing operation breakdown and operation flow chart selecting machine type and attachment and workaids planning machine layout for maximizing unidirectional material movement optimising inventory and storage space and maintaining workplace health and safety These are some of the areas that often lack significant attention This practitioner s handbook is an amalgamation of theory and practices including steps of implementation and common mistakes A balanced approach is taken to make it equally meaningful and useful for the academics as well as the industry A unique section titled industry practices is incorporated at the end of each chapter which shares the typical practices constraints and benefits accrued by the industry which will give meaningful insight to the readers and help them relate theory with actual practice Productivity

Improvement in Apparel Manufacturing Paul F. Bowes,Paul Collyer, Manoj Tiwari, Pradeep Jha, Mausmi Ambastha, Roberto Inglesi, Rajesh Bheda, Brad Mikes, Late Roger Thomas, Keerthi Abeywickrama, Pradeep Kumar Jha,2020-08-13 Productivity improvement means doing the same thing in a better and smarter way and continuing to work on improving the techniques for an individual or a team on the shopfloor And this continuous improvement is the only way to achieve high profitability Garment manufacturing involves number of operations carried out by different operators and all the activities starting from cutting sewing till finishing are different from each other in terms of the way they are performed and the technology being used for them So it is always advisable to look at the working of four aspects and that are material machine men and method However there are ways to build higher productive efficiencies which result in reduction in cost and bring in higher profit margin The book discusses different case studies from the shopfloor showing productivity improvements **Apparel**
