Basic Guide to System Safety Jeffrey W. Vincoli,2024-01-30 BASIC GUIDE TO SYSTEM SAFETY Instructional guide applying prevention through design concepts to the design and redesign of work premises tools equipment and processes Basic Guide to System Safety provides guidance on including prevention through design concepts within an occupational safety and health management system through the application of these concepts decisions pertaining to occupational hazards and risks can be incorporated into the process of design and redesign of work premises tools equipment machinery substances and work processes including their construction manufacture use maintenance and ultimate disposal or reuse

These techniques provide guidance for a life cycle assessment and design model that balances environmental and occupational safety and health goals over the lifespan of a facility process or product. The updated Fourth Edition reflects current and emerging industry practices and approaches providing an essential periodic review of the text to ensure its contents adequately meet the requirements of academia as well as other users in the occupational safety and health profession. The book also features a new chapter on Prevention through Design PtD and how it is linked to System Safety Engineering and Analysis. Topics covered in Basic Guide to System Safety include System safety criteria including hazard severity and probability, the hazard risk matrix and system safety precedence, System safety efforts including closed loop hazard tracking systems, accident risk assessments and mishap, accident and incident reporting, Fault or functional hazard analysis, management oversight and risk trees, HAZOP and what if analyses and energy trace and barrier analysis, ETBA, Sneak circuit analysis including types and causes of sneaks, input requirements and advantages and disadvantages of the technique. Providing essential fundamentals for readers who may not have a background or pre-requisite in the subject, Basic Guide to System Safety is an ideal introductory resource for the practicing safety and health professionals along with advanced students taking industrial safety courses.

Preventing Corporate Accidents Robert Whittingham, 2012-06-25

The passing of the Corporate Manslaughter and Corporate Homicide Bill in the UK and increasing public and investor pressure for good Corporate Governance and Corporate Social Responsibility means organizations now more than ever need to ensure they do all they can to prevent major accidents. However, past experience shows that just implementing safety management systems is not enough and this book makes the case for a more holistic and ethical approach to improving corporate systems as a whole. Preventing Corporate Accidents shows how major accidents can result from human error and defects in corporate systems. The book describes accident prevention strategies from safety culture, safety management systems, foresight and planning to safety regulations, corporate ethics, corporate social responsibility and the learning organization. Barry Whittingham illustrates with international case studies from various industries how and why these defences have failed in the past and more importantly how to strengthen corporate systems to prevent future major accidents. The case studies include The loss of the space shuttle Columbia, Infant heart surgery at Bristol Royal Infirmary, The Davis Besse nuclear power plant incident, The fire and explosion at the Conoco Phillips Humber oil refinery, Herald of Free Enterprise and Southall rail accident, manslaughter prosecutions. This book is essential reading for all those with a professional interest in health and safety management, the control of major risk and accident prevention in particular for directors, senior managers and health safety professionals in high hazard industries and public operations such as nuclear, chemicals, construction, oil and gas, energy, manufacturing and transportation. Barry Whittingham has worked as a senior manager, design engineer and consultant for the chemical, nuclear, offshore oil and gas, railway and aviation sectors. He developed a career as a safety consultant specializing in the human factors aspects of accident causation. Barry is a Fellow of the Safety and Reliability
