

Foreign Policy White Paper 2017

Submission by Ian Dudgeon

Introduction

This submission addresses the issues of the primary importance to us of the Asia-Pacific region, our interests and values, who we are and our image, the need for an independent foreign policy, the US alliance, regional engagement, our multilateral and international legal commitments, and aid and development assistance. It puts the views of the author, an active practitioner in international affairs.

The role of foreign policy

The fundamental role of Australia's foreign policy is to protect and promote Australia's national interests within the global community of which we are part.

Our region

While recognising we are part of a global community, the Asia-Pacific region is the area of primary importance to us for political, economic and national security reasons.

Geographically, this region reaches from South Asia through to North America. It includes India, China, Japan, South Korea, Russia, the US and Canada. It also includes Indonesia and the other ASEANs, as well as New Zealand and those Pacific Island states in the South West Pacific. Also included are critical sea lanes for international trade, especially the Malacca Strait and South China Sea.

This region is home to more than half the world's population, it is the new engine room of the global economy, and the region encompassing most of our two-way trade and investment. Also, more than anywhere else, any major event and most other events that occur in this region, inevitably, will affect at least some, potentially all, of Australia's national interests, directly or indirectly.

The Indo-Pacific region is also important to Australia, but in relative terms, less so than the Asia-Pacific. This region overlaps with South, East and S.E. Asia and extends vital two-way sea lanes westward to include oil supply routes from the Middle East and sea trade access to and from Europe. These western reaches are also where most ADF overseas operational deployments have occurred during the past decade and a half (e.g. Afghanistan, Iraq) in support of UN-mandated or other alliance commitments. But the region's eastern boundary stops mid-Pacific, and most significantly, excludes North America.

and North and South Korea the book argues that China's divergent responses were caused by different expectations according to whether states had a perceived identity as a friend or a rival. The author demonstrates that Chinese face culture shapes China's reaction to others through three dynamics of seeking saving and losing face. This book shows how identity and culture have worked in the relationship between China and neighboring countries through three case studies exploring North Korea's Taepodong 2 missile launch and first nuclear test in 2006, South Korea's decision to allow the United States to deploy the THAAD around 2016 and Japan's decision to deploy two U.S. X-band radars in 2005 and 2014. A timely analysis of the importance of identity and culture in international relations, the book will be of interest to scholars of Chinese foreign policy, Sino-South Korean relations, Sino-North Korean relations, Sino-Japanese relations, Korean Politics, Asian Politics and International Relations.

Handbook of the Geographies of Religion Lily Kong, Orlando Woods, Justin K.H. Tse, 2024-12-02

This international and interdisciplinary handbook offers a comprehensive and an in-depth overview of contemporary research theory and practice in the geographies of religion in various parts of the world and with different populations. The book showcases the major theoretical interventions in the field and the debates about the existential constitution of sacred space and what this means for secularization. It outlines the most significant geographical themes related to these new developments with their implications for how to think about landscapes, space, bodies and worlds. The book also discusses the future of the field, especially in the realms of encounters and ethics, economies and markets, institutions and organisations, movements and migrations and media and mediums. It also offers views from disciplines outside of geography, including from sociology, anthropology, religious studies and media and communications, which demonstrates the contributions of geographers of religion to wider intellectual conversations and debates.

Theory and Practice of Paradiplomacy Alexander S. Kuznetsov, 2014-10-17

This book examines and systematises the theoretical dimensions of paradiplomacy, the role of subnational governments in international relations. Throughout the world, subnational governments play an active role in international relations by participating in international trade, cultural missions and diplomatic relations with foreign powers. These governments, including states in the USA and landers in Germany, can sometimes even challenge the official foreign policy of their national government. These activities, which are regularly promoting the subnational government's interests, have been labelled as paradiplomacy. Through a systematisation of the different approaches in understanding constituent diplomacy, the author constructs an integrative theoretical explanatory framework to guide research on regional governments' involvement in international affairs. The framework is based on a multiple response questionnaire technique (MRQ) which provides the matrix of possible answers on a set of key questions for paradiplomacy scholarship. This comprehensive analysis of the phenomenon of paradiplomacy sheds light on the development of federalism and multi-level governance in a new global environment and contributes to the debates on the issue of actorness in contemporary international affairs. This book will be of much interest to students of diplomacy, federalism, governance, foreign policy and IR, as well as practitioners of

The United

Nations System Chadwick F. Alger, Gene M. Lyons, John E. Trent, 1995 The essays in this volume provide a comparative study of national policies towards the United Nations Eight cases have been selected Algeria Canada France Japan the Netherlands Nigeria the United Kingdom and the United States Each case study details a government's historical position on the United Nations its past present and possible future expectations of the organization and UN related issues of special interest and the circumstances behind them *Criminal Insurgents in Mexico and Latin America* John P. Sullivan, Robert J.

Bunker, 2015-03-05 The 4th Small Wars Journal El Centro anthology comes at a pivotal time roughly a third of the way through the term for the Enrique Peña Nieto administration in Mexico The mass kidnapping and execution of 43 rural student teachers in Iguala Guerrero in late September 2014 has only served to further highlight the corruptive effects of organized crime on the public institutions in that country In addition many other states in Latin America are now suffering at the hands of criminal insurgents who are threatening their citizens and challenging their sovereign rights Dave Dilegge SWJ Editor in Chief **Reports and Documents** United States. Congress, 1961 *Wars of Revelation* Rebecca Lissner, 2021-10-26 Rich in historical detail and theoretical insight Wars of Revelation explains why the United States military interventions have repeatedly transformed its global role and what that means for the future of American grand strategy More than seventy five years since the end of World War II military interventions rather than major wars have emerged as a defining feature of contemporary geopolitics Yet for all the fierce policy debates over interventions and their lessons scholars have largely ignored the systematic linkages between these smaller scale wars and transformations in the grand strategies of states that prosecute them In Wars of Revelation Rebecca Lissner explains why military interventions can be crucibles of grand strategy testing strategic axioms on the battlefield and prompting combatant states to reconceive their global roles Through detailed historical case studies of US involvement in the Korean Vietnam and Persian Gulf Wars Lissner shows how each intervention generated searing insights into the capabilities and intentions of America's international adversaries as well as the potential and limits of its own national power By focusing on these three wars of revelation Lissner presents a fresh perspective on the origins and evolutions of US grand strategy from the dawn of the Cold War to its twilight Persuasively argued and historically illuminating Wars of Revelation is essential reading for anyone who crafts studies or follows international security policy

Asian Perceptions of Gulf Security Li-Chen Sim, Jonathan Fulton, 2022-11-28 Gulf stability is coming to play a larger role in the foreign policy calculus of many states but the evolving role of Asian powers is largely under represented in the International Relations literature This volume addresses this gap with a set of empirically rich theory driven case studies written by academics from or based in the countries in question The underlying assumption is not that Asian powers have already become important security actors in the Gulf but rather that they perceive the Gulf as a region of increasing strategic relevance How will leaders in these countries adjust to an evolving regional framework Will there be coordinated efforts to establish an Asian centered approach to Gulf stability or will Asian rivalries make the region a theater of competition Will US

China tensions force alignment choices among Asian powers Will Asian states balance bandwagon hedge or adopt some other approach to their Gulf relationships These questions become even more important as the western boundaries of Asia increasingly come to incorporate the Middle East The book will appeal to scholars and students in the fields of International Relations Security Studies and International Political Economy as well as area specialists on the Gulf and those working on foreign policy issues on each of the Asian countries included Professionals in government and non government agencies will also find it very useful The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
