

International Yearbook of Industrial Statistics

Global Highlights 2023

Industrial sectors, which comprise mining, manufacturing and the utilities sectors, grew by 2.3 per cent in 2022 globally. Manufacturing accounted for most of this dynamism, with an increase of 3.2 per cent, while the combined mining and utilities sector contracted by 0.9 per cent. Industry is expected to decelerate in 2023 due to mounting headwinds from various sources. While manufacturing drives industrial growth at the global level, in low-income economies the largest contributor remains the mining and utilities sector.

In recent years, the world seems to be navigating a double decoupling in manufacturing, one positive and one negative. On the positive side, there is evidence of a decoupling between manufacturing activity and CO₂ emissions, with emissions remaining relatively flat while production keeps increasing. This trend is evident in most country groups, although the levels of emission intensity remain high in most cases. On the negative side, there is also a decoupling between manufacturing production and employment. Indeed, higher levels of global manufacturing output have not translated into more jobs. In particular, the employment of women in manufacturing has followed a downward trend, further accelerated due to the COVID-19 pandemic.

A clear global development observed over the last decades is the rebalancing of manufacturing from high-income economies towards middle-income economies, as well as from Northern America and Europe towards Asia and Oceania. The COVID-19 crisis further accelerated this macro-level trend.

Another worldwide megatrend is the expanding importance of higher technology industries in manufacturing. These industries recovered faster post-COVID-19 and have continued expanding dynamically, while growth in lower technology industries has stalled. This divergence could further increase inequalities within and between countries.

Excepting high-income industrial economies and Latin America and the Caribbean, all regions and country groups have achieved progress towards SDG 9 since 2015, although the rate of progress has generally been insufficient to reach the global Goal by 2030. This is a particular cause of concern in least developed countries (LDCs), where industrialization is one of the most promising development strategies.

This edition of the Yearbook included a thematic chapter on innovation statistics. Existing indicators suggest that the world's most innovative economies are concentrated in Europe, Eastern Asia and Northern America. However, further investment in data are needed to fully measure the incidence, drivers, obstacles and impacts of industrial innovation and provide crucial information for guiding policies in this area.

Industrial Statistics Yearbook 201: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Industrial Statistics Yearbook 201 : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
