Enterprise Interoperability V Raúl Poler, Guy Doumeingts, Bernhard Katzy, Ricardo Chalmeta, 2012-02-25 Within a scenario of globalised markets where the capacity to efficiently cooperate with other firms starts to become essential in order to remain in the market in an economically socially and environmentally cost effective manner it can be seen how the most innovative enterprises are beginning to redesign their business model to become interoperable This goal of interoperability is essential not only from the perspective of the individual enterprise but also in the new business structures that are now emerging such as supply chains virtual enterprises interconnected organisations or extended enterprises as well as in mergers and acquisitions Composed of over 40 papers Enterprise Interoperability V ranges from academic research through case studies to industrial and administrative experience of interoperability The international nature of the authorship continues to broaden Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas The I ESA 12 Conference from which this book is drawn was organized by Polytechnic University of Valencia on behalf INTERVAL and the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and sponsored by the International Federation for Information Processing IFIP and the International Federation of Automatic Control IFAC A concise reference to the state of the art in systems interoperability Enterprise Interoperability V will be of great value to engineers and computer scientists working in

manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment

Thriving in Digital Workspaces Melinde Coetzee, 2019-08-30 This edited volume focuses on innovative solutions to the debate on human thriving in the fast emerging technology driven cyber physical work context also called Industry 4.0 The volume asks the important question How can people remain relevant and thrive in workplaces that are increasingly virtual technology driven and imbued with artificial intelligence This volume includes two major streams of discussion it provides multidisciplinary perspectives on what thriving could mean for individuals managers and organisations in current and future non linear and Web driven workspaces In this context it points to the need to rethink the curricula of the psychology of human thriving so that it is applicable to Industry 4.0 Second it discusses the new platforms of learning opening up in organisations and the ways and means with which people's learning practices can be adapted to changing scenarios Some of these scenarios are changing job designs and talent requirements the demand for creativity the need for virtual teams and intercultural collaborations and changing emotional competencies This topical volume includes contributions by scholars from across the world and is of interest to scholars practitioners and postgraduate students of psychology organizational behaviour and human resource management

Sustainable Technology Development Paul Weaver, Leo Jansen, Geert van Grootveld, Egbert van Spiegel, Philip Vergragt, 2017-09-08 In the time it takes to read this sentence about fifteen people will be added to the world's population Read the sentence again and there will be thirty Tomorrow each of these people will be demanding greater prosperity Production and consumption are increasing fast but will have to grow even faster in the future to keep up with population growth and a world increasingly divided by inequality How should we react to these trends Certainly many use growth figures to forecast disaster But there is an alternative vision one of a sustainable future in which growth is seen not as a threat but as the driving force behind innovation This is the scenario worked out in the Netherlands by Sustainable Technology Development STD a five year programme of research and learning by doing based on setting up new innovation networks and working with new methods to search for sustainable technological solutions In order to make sustainability tangible STD made a leap in time What human needs will have to be satisfied fifty years from now Taking a sustainable future vision as a starting point STD demonstrated what steps we should take today for new technologies and systems to be in place in time These results are now available for the first time in a comprehensive specifically written English language book together with a description of the unique working method of STD and the results and key lessons from a set of the programme's illustrative case studies This book serves as a manual for industry governments and social leaders wanting to prepare themselves for a sustainable future Sustainable Technology Development sets out the programme's underpinning philosophy and describes its approach methods and findings Delivering sustainability means finding ways to meet human needs using a fraction of the natural resources we use today The world's richer nations would be wise to target at least ten fold improvements by 2050 in the productivity with which conventional

natural resources and environmental services are used And they need to bring new sustainable resources on stream to augment the resource base and replace the use of unsustainable alternatives Sustainable Technology Development marks a significant contribution to our understanding of innovation processes and how these might be influenced in favour of sustainable technology development In principle technology could play a pivotal role in sustainable development Whether it does or not depends on whether innovators can be encouraged to make this an explicit goal adopt long term time horizons and search for renewable technologies Given the long lead times involved there is no time to waste in beginning the search The STD programme has begun to make inroads into one of the most urgent of all needs concerning sustainable development that for innovation in the innovation process itself

Innovation and the Future Proof Bank James A Gardner, 2011-04-20

Innovation the conversion of the new to business as usual is a very special business process It is the business process able to reprogram all others Creating the practices that make this process work is a key challenge for all in financial services that are worried about responding to the future When an institution can identify things that are outside its present practices and convert them production line style into products processes cultural changes or new markets it will never be outpaced by internal or external change again The institution becomes FutureProof This is a book about those practices in banks It explains using examples from institutions around the world what it takes to create an innovation culture that consistently introduces new things into undifferentiated markets and internal cultures It shows how banks can leverage the power of the new to establish unexpected revenue lines or make old ones grow And it provides advice on the social and political factors that either help or hinder the germination of the new in banks Moreover though this is a book about the science of innovation in a banking context Drawing from practices already highly developed in financial services managing portfolios of assets to mitigate risk it explains how practitioners can run their innovations groups like any other business line in the bank one that delivers a return on investment predictably and at high multiples of internal cost of capital For leaders Innovation and the Future Proof Bank provides the diagnostic tools to guide benchmarking and investment decisions for the innovation function And for innovation practitioners the book lays out everything needed to make sure that converting the new to business as usual is predictable measurable and profitable

Innovation Development for Highly Energy-Efficient Housing E. Mlecnik, IOS Press, 2013-03-20

In previous years we have seen a recognition of the significant potential that exists for reducing energy use through innovation in residential buildings This study investigates innovation challenges and identifies opportunities that could lead to a rapid increase in the adoption of highly energy efficient housing concepts particularly that of the passive house To this end it exemplifies interprets and develops the innovation adoption theory through an investigation of views and experiences on the supply side the demand side and the policy side It highlights successful innovation trajectories and barriers experienced by businesses It addresses both problems and positive experiences from the perspective of the end user and investigates different policy approaches As such the research reveals important features of

innovation adoption strategies in the building sector It shows how multi player enterprise collaboration plays a key role and the study also recommends the development of quality assurance schemes It makes a valuable contribution to discussions about how active the role of government policymakers and enterprise networks should be *A Modern Enterprise Architecture Approach* Dr Mehmet Yildiz, 2019-10-07 The revised version of this book to provide essential guidance compelling ideas and unique ways to Enterprise Architects so that they can successfully perform complex enterprise modernisation initiatives transforming from chaos to coherence This is not an ordinary theory book describing Enterprise Architecture in detail There are myriad of books on the market and in libraries discussing details of enterprise architecture My aim here is to highlight success factors and reflect lessons learnt from the field within enterprise modernisation and transformation context As a practising Senior Enterprise Architect myself I read hundreds of those books and articles to learn different views They have been valuable to me to establish my foundations in the earlier phase of my profession However what is missing now is a concise guidance book showing Enterprise Architects the novel approaches insights from the real life experience and experimentations and pointing out the differentiating technologies for enterprise modernisation If only there were such a guide when I started engaging in modernisation and transformation programs The biggest lesson learned is the business outcome of the enterprise modernisation What genuinely matters for business is the return on investment of the enterprise architecture and its monetising capabilities The rest is the theory because nowadays sponsoring executives due to economic climate have no interest attention or tolerance for non profitable ventures I am sorry for disappointing some idealistic Enterprise Architects but with due respect it is the reality and we cannot change it This book deals with reality rather than theoretical perfection Anyone against this view on this climate must be coming from another planet In this concise uncluttered and easy to read book I attempt to show the significant pain points and valuable considerations for enterprise modernisation using a structured approach and a simple narration especially considering my audience from non English speaking backgrounds The architectural rigour is still essential We cannot compromise the rigour aiming to the quality of products and services as a target outcome However there must be a delicate balance among architectural rigour business value and speed to the market I applied this pragmatic approach to multiple substantial transformation initiatives and complex modernisations programs The key point is using an incrementally progressing iterative approach to every aspect of modernisation initiatives including people processes tools and technologies as a whole Starting with a high level view of enterprise architecture to set the context I provided a dozen of distinct chapters to point out and elaborate on the factors which can make a real difference in dealing with complexity and producing excellent modernisation initiatives As eminent leaders Enterprise Architects are the critical talents who can undertake this massive mission using their people and technology skills in addition to many critical attributes such as calm and composed approach Let s keep in mind that as Enterprise Architects we are architects not firefighters I have full confidence that this book can

provide valuable insights and some aha moments for talented architects like yourself to tackle this enormous mission of turning chaos to coherence

Law at Work Baudouin Dupret, Michael Lynch, Tim Berard, 2015-07-15 The studies in this volume use ethnographic ethnomethodological and sociolinguistic research to demonstrate how legal agents conduct their practices and exercise their authority in relation to non expert participants and broader publics Instead of treating law as a body of doctrines or law and society as a relationship between legal institutions and an external society the studies in this volume closely examine law at work specific legal practices and social interactions produced in national and international settings These settings include courtrooms and other tribunals consultations between lawyers and clients and media forums in which government officials address international law Because law is a public institution and legal actions are publicly accountable technical law must

interface with non expert members of the public The embodied actions and interactions that comprise the interface between professional and lay participants in legal settings therefore must do justice to legal traditions and statutory obligations while also contending with mundane interactional routines ordinary reasoning and popular expectations Specific chapters examine topics such as family disputes in a system of Sharia Law rhetorical contestations about possible violations of international law during a violent conflict in the Middle East the transformation of a courtroom hearing brought about by the virtual presence of remote witnesses relayed through a video link the practices through which written records are used to mediate and leverage a witness s testimony and the discursive and interactional practices through which authorized parties use legal categories to problems with individual conduct Each chapter shows that it makes a profound difference to the way we understand the law when we examine its meaning and application in practice

Diffusion of Innovations, 4th Edition Everett M. Rogers, 2010-07-06 Since the first edition of this landmark book was published in 1962 Everett Rogers s name has become virtually synonymous with the study of diffusion of innovations according to Choice The second and third editions of Diffusion of Innovations became the standard textbook and reference on diffusion studies Now in the fourth edition Rogers presents the culmination of more than thirty years of research that will set a new standard for analysis and inquiry The fourth edition is 1 a revision of the theoretical framework and the research evidence supporting this model of diffusion and 2 a new intellectual venture in that new concepts and new theoretical viewpoints are introduced This edition differs from its predecessors in that it takes a much more critical stance in its review and synthesis of 5 000 diffusion publications During the past thirty years or so diffusion research has grown to be widely recognized applied and admired but it has also been subjected to both constructive and destructive criticism This criticism is due in large part to the stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study Rogers analyzes the limitations of previous diffusion studies showing for example that the convergence model by which participants create and share information to reach a mutual understanding more accurately describes diffusion in most cases than the linear model Rogers provides an entirely new set of case examples from the Balinese Water Temple to Nintendo videogames that beautifully illustrate his expansive research as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade Most important he discusses recent research and current topics including social marketing forecasting the rate of adoption technology transfer and more This all inclusive work will be essential reading for scholars and students in the fields of communications marketing geography economic development political science sociology and other related fields for generations to come
