In Real Life Nev Schulman, 2014-09-11 If there's anyone who knows about the darker side of online dating it's Nev Schulman. The 29-year-old rose to fame after his documentary *Catfish* about an online flirtation of his which turned sour became a breakout hit. He followed it up with a series on MTV which followed similar stories of digital deception across America. Nev has become the go-to expert in online relationships for millennials, a generation who have never known a world without Facebook. His clout in this area springs from his own experience which led him to coin the term *catfish* referring to someone who creates a false online persona to reel someone into a romantic relationship. Now Nev takes his investigation to the page. Woven throughout with Nev's personal stories, this book explores relationships in the era of social media, delving deeply into the complexities of dating in a digital age and continuing the cultural dialogue his show has begun about how we interact with each other online. In *IN REAL LIFE* Nev explores the pressing issue of connectivity versus genuine connection which is plaguing our relationships with each other and he provides the advice that his fans have been desperately seeking.

The Oxford Handbook of Cyberpsychology Alison Attrill-Smith, Chris Fullwood, Melanie Keep, Daria J. Kuss, 2019-05-16 The internet is so central to everyday life that it is impossible to contemplate life without it. From finding romance to conducting business, receiving health advice, shopping, banking, and gaming, the internet opens up a world of possibilities to people across the globe. Yet for all its positive attributes, it is also an environment where we witness the very worst of human behaviour: cybercrime, election interference, fake news, and trolling, being just a few examples. What is it about this unique environment that can make people behave in ways they wouldn't contemplate in real life? Understanding the psychological processes underlying and influencing the thinking, interpretation, and behaviour associated with this online interconnectivity is the core premise of Cyberpsychology. *The Oxford Handbook of Cyberpsychology* explores a wide range of cyberpsychological processes and activities through the research and writings of some of the world's leading cyberpsychology experts. The book is divided into eight sections covering topics as varied as online research methods, self-presentation and impression management, technology across the lifespan, interaction and interactivity, online groups and communities, social media, health and technology, video gaming, and cybercrime and cybersecurity. *The Oxford Handbook of Cyberpsychology* will be important reading for those who have only recently discovered the discipline as well as more seasoned cyberpsychology researchers and teachers.
