Managing For Performance Excellence:

Insights to Performance Excellence 2021-2022 Mark L. Blazey, Paul L. Grizzell, 2021-03-29 For decades this book has served as a guide to organizations that document their continuous improvement efforts using Baldrige Award type management systems. Readers will learn what each area of the system means for organizations and how the synergy between process oriented parts, leadership, strategy, customers, measurement, analysis, and knowledge management, workforce and operations can lead to excellent performance results. This book provides a valuable step by step approach to help identify and put in place properly focused continuous improvement systems. Seven types of information are provided in this book for each of the Items in Categories 1 through 7 of the 2021-2022 Baldrige Framework and Performance Excellence Criteria: 1. The actual language of each Item including Notes; 2. A plain English explanation of the requirements and rationale for each Item; 3. A table showing the similar requirements of the Criteria; 4. A summary of the requirements of each Item in flowchart form; 5. The key linkages between each Item and other Items; 6. An explanation of some potential adverse consequences; 7. Examples of effective practices. Features of this edition include: A stakeholder matrix table of contents that identifies relevant material within the book for key stakeholder groups: senior leaders, examiners, performance excellence initiative leaders, application writers, and program administrators; Tables for each Criteria Item showing the similar expectations of the Criteria award and award program administrators presented only once at the scoring level where the expectation first appears to help examiners determine at what level an expectation belongs; Online resources including scoring calibration guides for education, healthcare, and business nonprofit government organizations; a guide to self assessment of organizations and management systems; and a guide to the alignment of Baldrige, Six Sigma, Lean, and Balanced Scorecard. A new crosswalk between Baldrige and ISO standards and a set of global performance excellence best practices. Information on other award programs throughout the world such as the European Foundation for Quality Management (EFQM) which has undergone significant changes in the 2020 model and the China Association for Quality.

Managing for performance excellence Kurt Verweire, Regine Slagmulder, Koen Dewettinck, 2012-05-24 Managing for Performance Excellence provides practitioners with an integrative framework that highlights the key ingredients of an effective approach to performance management. It describes the formal process of planning, measuring, and

monitoring performance that companies need to develop as the first step towards becoming a highperforming organisation. As the numerous examples show, a well functioning process by itself does not guarantee enduring success. Based on an in depth analysis of real life situations, the authors draw attention to potential pitfalls and highlight four concrete performance management challenges that companies need to address: clear strategic focus, engaging climate, collaborative structure and solid information infrastructure. Performance management is examined from a number of different perspectives with ample illustrations and practical guidelines against which readers can benchmark their own organisations. These insights are a product of the multidisciplinary pool of expertise present at Vlerick Leuven Gent Management School, a school renowned for its successful mix of academic knowledge and business relevance.
