The Principal of the school wishes to select a sample of 25 students. She wishes to ensure that, as closely as possible, the proportion of the students from each grade in the sample is the same as the proportions in the school.

- (a) Calculate the number of grade 12 students who should be in the sample. [3]

Mathematical Studies Standard Level for the IB Diploma Coursebook Caroline Meyrick, Kwame Dwamena, 2013-05-30

This completely new title is written to specifically cover the new IB Diploma Mathematical Studies syllabus. The significance of mathematics for practical applications is a prominent theme throughout this coursebook, supported with Theory of Knowledge internationalism and application links to encourage an appreciation of the broader contexts of mathematics. Mathematical modelling is also a key feature. GDC tips are integrated throughout with a dedicated GDC chapter for those needing more support. Exam hints and IB exam style questions are provided within each chapter. Sample exam papers online can be tackled in exam style conditions for further exam preparation. Guidance and support for the internal assessment is also available, providing advice on good practice when writing the project. Hemomath Antonio Fasano, Adélia

Sequeira, 2017-10-30. This book illustrates applications of mathematics to various processes, physiological or artificial, involving flowing blood, including hemorheology, microcirculation, coagulation, kidney filtration and dialysis, offering a historical overview of each topic. Mathematical models are used to simulate processes normally occurring in flowing blood and to predict the effects of dysfunctions, e.g. bleeding disorders, renal failure, as well as the effects of therapies, with an eye to improving treatments. Most of the models have a completely new approach that makes patient specific simulations possible. The book is mainly intended for mathematicians interested in medical applications, but it is also useful for clinicians such as hematologists, nephrologists, cardio surgeons and bioengineers. Some parts require no specific knowledge of mathematics. The book is a valuable addition to mathematics, medical biology and bioengineering libraries. Introducing the IB Diploma Programme Marc Abrioux, Jill Rutherford, 2013-02-14. Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time, effort and money in order to become authorised. This manual is a resource for schools already offering the diploma, as well as for prospective diploma schools.

Singer,2013-03-08 James Lepowsky t The search for symmetry in nature has for a long time provided representation theory with perhaps its chief motivation According to the standard approach of Lie theory one looks for infinitesimal symmetry Lie algebras of operators or concrete realizations of abstract Lie algebras A central theme in this volume is the construction of affine Lie algebras using formal differential operators called vertex operators which originally appeared in the dual string theory Since the precise description of vertex operators in both mathematical and physical settings requires a fair amount of notation we do not attempt it in this introduction Instead we refer the reader to the papers of Mandelstam Goddard Olive Lepowsky Wilson and Frenkel Lepowsky Meurman We have tried to maintain consistency of terminology and to some extent notation in the articles herein To help the reader we shall review some of the terminology We also thought it might be useful to supplement an earlier fairly detailed exposition of ours 37 with a brief historical account of vertex operators in mathematics and their connection with affine algebras Since we were involved in the development of the subject the reader should be advised that what follows reflects our own understanding For another view see 29 1 t Partially supported by the National Science Foundation through the Mathematical Sciences Research Institute and NSF Grant MCS 83 01664 1 We would like to thank Igor Frenkel for his valuable comments on the first draft of this introduction

Applied Mechanics Reviews ,1966 A new fault diagnosis method based on attributes weighted neutrosophic set LINFENG GOU, YU ZHONG, Fault diagnosis is an extensively applied issue to monitor condition and diagnose fault for safe and stable operation of the machine which started to develop during the industrial revolution and applies various theories and technologies Due to the growing complexity of contributing factors of a fault and the correlation of fault attributes which are often interrelated traditional fault diagnosis methods fails to handle with this complex condition To solve this problem a new fault diagnosis method based on attributes weighted neutrosophic set is proposed in this paper In the proposed approach a attributes weighted model is developed to obtain the weights of attributes by the fault information For a sample whose fault type is unknown the neutrosophic set generated from the fault sample data are aggregated via the single valued neutrosophic power weighted averaging SVNPA operator with the obtained attributes weights then the fault diagnosis results could be determined by the defuzzification method of fused neutrosophic set This proposed method have capacity to differentiate the individual impact of attributes and handle the uncertain problems in the process of fault diagnosis Finally an illustrative example was provided to demonstrate the reasonableness and effectiveness of the proposed method **Leptons and Quarks** L.B.
