Beginning Java SE 6 Platform Jeff Friesen, 2007-12-22 Beginning Java SE 6 Platform From Novice to Professional steers you through the maze of Java Standard Edition SE 6 features The first chapter sets the stage by introducing Java SE 6 in terms of its name change themes an overview and a sampling of new features It also briefly discusses the first two Java SE 6 updates The remaining nine chapters organize features into the following categories core libraries GUI toolkits AWT GUI toolkits Swing internationalization Java Database Connectivity monitoring and management networking scripting and security and web services While exploring these chapters you will encounter a variety of useful and interesting topics introducing a new locale with its own currency creating a new JConsole plug in creating a scripted JEditorPane component invoking and communicating with JavaFX Script and JRuby scripts from a Java application that interacts with the Scripting API signing an arbitrary XML document and validating a signed document s XML signature and accessing an existing web service are examples With a few exceptions each of chapters 2 through 10 alphabetically organizes its topics for convenient access Furthermore all 10 chapters end with a Test Your Understanding section that provides questions and exercises to help you reinforce your understanding of what you have read Additional features are covered in the first three appendices The first appendix introduces you to annotation types for annotation processors Common Annotations 1.0 and several tables that conveniently organize additional annotation types that are new to Java SE 6 The second appendix explores changes made to various Java tools For example the Java compiler tool now supports annotation processing you ll learn how to take advantage of this capability by writing your own annotation processor Another example you ll learn how to interact with the command line script shell The third appendix looks at a variety of performance enhancements ranging from a fix for the gray rect problem to single threaded rendering The second to last appendix provides answers and code to all of the questions and exercises in the various Test Your Understanding sections The final appendix anticipates Java SE 7 by looking at features most likely to make the cut including closures the Java Module System and the Swing Application Framework By the time you finish this book you will have mastered most of what s new and improved in Java SE 6 Although a few features such as multiple gradient paints and an in depth look at StAX are not covered you will find a growing list of articles devoted to these additional topics on the author s website JavaJeff.mb.ca Follow the links at the bottom of the website s Articles page

Java Web Services in a Nutshell Kim Topley, 2003 This title is a high speed tutorial and handy quick reference to the APIs for implementing web services in Java It is intended for Java developers who need to implement Java web services or who need their applications to access existing web services

Java: A Beginner's Tutorial (4th Edition) Budi Kurniawan, 2015-01-08 Updated for Java SE 8 this book teaches the three most important topics in Java programming the language syntax object oriented programming OOP and Java core libraries This book introduces important programming concepts and is a guide to building real world applications both desktop and web based The coverage is the most

comprehensive one can find in a beginner's book **Beginning Java EE 5** Kevin Mukhar, James Weaver, James Crume, Chris Zelenak, 2006-11-02 Sun's new lightweight Java Enterprise Edition EE 5 is an extremely powerful platform for developing enterprise level Java based applications primarily for the server. This book shows you how to harness that power examining how the pieces of the new Java EE 5 platform fit together including the redesigned annotations driven EJB 3 spec as well as JavaServer Faces JSF integrated into the platform for the first time. Hands on tutorials are also included along with clear explanations and working code examples. You will grow to take the next step from writing client side desktop applications to writing enterprise applications. You will also learn how to use the individual APIs and tools in the Java EE 5 platform and how to merge these to create your own enterprise applications.

Beginning Java 7 Jeff Friesen, 2012-01-23 Beginning Java 7 guides you through version 7 of the Java language and a wide assortment of platform APIs. New Java 7 language features that are discussed include switch on string and try with resources. APIs that are discussed include Threading the Collections Framework, the Concurrency Utilities, Swing, Java 2D, networking, JDBC, SAX, DOM, StAX, XPath, JAX-WS and SAAJ. This book also presents an introduction to Android app development so that you can apply some of its knowledge to the exciting world of Android app development. This book presents the following table of contents: Chapter 1 introduces you to Java and begins to cover the Java language by focusing on fundamental concepts such as comments, identifiers, variables, expressions, and statements. Chapter 2 continues to explore this language by presenting all of its features for working with classes and objects. You learn about features related to class declaration and object creation, encapsulation, information hiding, inheritance, polymorphism, interfaces, and garbage collection. Chapter 3 focuses on the more advanced language features related to nested classes, packages, static imports, exceptions, assertions, annotations, generics, and enums. Additional chapters introduce you to the few features not covered in Chapters 1 through 3. Chapter 4 largely moves away from covering language features although it does introduce class literals and strictfp while focusing on language oriented APIs. You learn about Math, StrictMath, Package, Primitive Type Wrapper Classes, Reference, Reflection, String, StringBuffer, and StringBuilder, Threading, BigDecimal, and BigInteger in this chapter. Chapter 5 begins to explore Java's utility APIs by focusing largely on the Collections Framework. However, it also discusses legacy collection oriented APIs and how to create your own collections. Chapter 6 continues to focus on utility APIs by presenting the concurrency utilities along with the Objects and Random classes. Chapter 7 moves you away from the command line user interfaces that appear in previous chapters and toward graphical user interfaces. You first learn about the Abstract Window Toolkit foundation and then explore the Java Foundation Classes in terms of Swing and Java 2D. Appendix C explores Accessibility and Drag and Drop. Chapter 8 explores filesystem oriented I/O in terms of the File, RandomAccessFile, stream, and writer reader classes. Chapter 9 introduces you to Java's network APIs e.g. sockets. It also introduces you to the JDBC API for interacting with databases along with the Java DB database product. Chapter 10 dives into Java's XML support by first presenting an introduction to XML including DTDs and

schemas It next explores the SAX DOM StAX XPath and XSLT APIs It even briefly touches on the Validation API While exploring XPath you encounter namespace contexts extension functions and function resolvers and variables and variable resolvers Chapter 11 introduces you to Java s support for SOAP based and RESTful web services As well as providing you with the basics of these web service categories Chapter 11 presents some advanced topics such as working with the SAAJ API to communicate with a SOAP based web service without having to rely on JAX WS You will appreciate having learned about XML in Chapter 10 before diving into this chapter Chapter 12 helps you put to use some of the knowledge you ve gathered in previous chapters by showing you how to use Java to write an Android app s source code This chapter introduces you to Android discusses its architecture shows you how to install necessary tools and develops a simple app Appendix A presents the solutions to the programming exercises that appear near the end of Chapters 1 through 12 Appendix B introduces you to Java s Scripting API along with Java 7 s support for dynamically typed languages Appendix C introduces you to additional APIs and architecture topics Examples include Accessibility classloaders Console Drag and Drop Java Native Interface and System Tray Appendix D presents a gallery of significant applications that demonstrate various aspects of Java Unfortunately there are limits to how much knowledge can be crammed into a print book For this reason Appendixes A B C and D are not included in this book s pages Instead these appendixes are freely distributed as PDF files Appendixes A and B are bundled with the book s associated code file at the Apress website <http://www.apress.com/9781430239093> Appendixes C and D are bundled with their respective code files at my TutorTutor.ca website <http://tutortutor.ca/cgi-bin/makepage.cgi/books/bj7>

Software Engineering for Modern Web Applications: Methodologies and Technologies Brandon, Daniel

M.,2008-06-30 This book presents current effective software engineering methods for the design and development of modern Web based applications Provided by publisher **Beginning J2EE 1.4** James Weaver, Kevin Mukhar, James

Crume,2008-01-01 The Java 2 Enterprise Edition J2EE is an extremely powerful platform for developing enterprise level Java based applications primarily for the server This book shows you how to harness that power guiding you through the details of how the pieces of the J2EE platform fit together This book goes further than just showing you how to code a JSP or an EJB It explains when and where to use these APIs what their strengths and weaknesses are and perhaps most important how to employ the best practices for using them This book also contains hands on tutorials clear explanations and working code examples that will take you to the next step from writing client side desktop applications to writing enterprise applications You will learn how to use the individual APIs and tools in the J2EE platform and how to bring these together to create your own enterprise applications **Beginning JavaServer Pages** Vivek Chopra, Jon Eaves, Rupert Jones, Sing Li, John T.
