Managing and Improving School Attendance and Behaviour Ken Reid, 2017-10-02 This new book on school attendance and behaviour brings an international flavour to the field with contributions on some of the latest empirical research and thinking from around the world It includes contributions from Canada and the USA Hong Kong Europe the United Kingdom and Ireland Some of the interesting wide ranging and often unique topics covered in the book include truancy and well being disaffection pupil absenteeism social mediation aggression in primary schools bullying emotional barriers to learning behaviour management training exclusion reintegration the role of educational psychologists and ethnic diversity and classroom disruption in the context of migration policies The book should prove both helpful and useful for a wide range of professionals students and academics across a wide range of educational care and social policy disciplines This book was originally published as a special issue of Educational Studies An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree **Beyond Test Scores** Jack Schneider, 2017-08-14 When it comes to sizing up America s public schools test scores are the go to metric of state policy makers and anxious parents looking to place their children in the best schools Yet ample research indicates that standardized tests are a poor way to measure a school s performance It is time indeed past time to rethink this system Jack Schneider says Beyond Test Scores reframes current debates over school quality by offering new approaches to educational data that can push us past our unproductive fixation on test scores Using the highly diverse urban school district of Somerville

Massachusetts as a case study Schneider and his research team developed a new framework to more fairly and comprehensively assess educational effectiveness And by adopting a wide range of measures aligned with that framework they were able to more accurately capture a broader array of school strengths and weaknesses Their new data not only provided parents educators and administrators with a clearer picture of school performance but also challenged misconceptions about what makes a good school With better data Schneider shows stakeholders at the federal state and local levels can undo the damage of present accountability systems and build greater capacity in our schools Policy makers administrators and school leaders can better identify where assistance is needed Educators can engage in more evidence based decision making And parents can make better informed choices for their children Perhaps most importantly better data can facilitate communication among all these groups allowing them to take collective action toward shared concrete goals
