

1B Mathematics SL Worksheet 2 Financial Math Summer 2013

Please do this on a separate sheet of graph paper. Use any standard graph paper from the last six years.

The theme of this worksheet is financial math. Please round all answers to two decimal places unless unless told otherwise.

1. As you know, stock prices generally fluctuate daily. Suppose one share of a company's stock sells for \$50 on Monday morning, but on Monday afternoon, it sells for \$51.

The formula $\text{Percentage Change} = \frac{\text{Change in price}}{\text{previous price}}$ tells you how much a price changes, as a percentage. Notice that you always compare to the previous price (in this example, \$50), not the final price (in this example, the new one \$51 as the denominator). That means for multiplying by 100 for the "convert the decimal over" two places.

In this example, the change in price is $\$51 - \$50 = \$1$, so the percentage change is $\frac{\$1}{\$50} \cdot 100\% = 0.02 \cdot 100\% = 2\%$. So the stock price went up 2% on Monday.

- If a stock starts at \$51 and comes up to \$52, what is the percentage change in price? The answer is not 2%.
- Would you rather have 100% of your uncle's money, or 2% of Bill Gates' money? Explain.
- Which would have the biggest 2% of \$50, or 2% of \$50.7? Explain.
- Explain why a stock that increases by the same amount each day does not grow by the same percentage each day.

You may think how stock prices change over time. (For instance, type in "stock quote" and a month's time, and then enter the company's name. Many companies have stock, although private companies, such as Google, don't.)

Here's how a typical stock quote looks online. This one is from Yahoo Finance, and it indicates how much one share of Netflix stock changed during the day on Friday, July 4, 2013.

Netflix, Inc. (NFLX)	Stock Price
225.10	+4.19 (1.90%) Jul 4, 2013 12:1

What this tells us is that one share of Netflix stock, which is abbreviated by the ticker symbol NFLX, went up \$4.19.

- How much was one share of NFLX one day earlier?
- Explain that a stock price that begins at \$250.91 and goes up \$4.19 would, indeed, increase by 1.63%. Show the work.
- Marnie calculated the percent change as $\frac{\$4.19}{\$225.10} \cdot 100\% = 1.86\%$. Explain what Marnie did incorrectly.
- Not all stocks go up every day. For instance, Netflix & Company (ticker: NFLX) had this stock quote. The price started at \$44.32 on July 3, 2013. How much was it worth the previous day?
- Explain that the percent change was indeed calculated correctly.

Netflix & Company (NFLX)	Stock Price
44.32	+0.68 (1.51%) Jul 3, 2013 12:1

2. Look at the prices of one share of Netflix & Company over the past week. (Notice that the stock market was closed on July 4, which is a holiday, so stock markets are closed.)

Date	June 28, 2013	July 1, 2013	July 2, 2013	July 3, 2013	July 4, 2013
Share Price	\$36.75	\$39.47	\$47.39	\$49.30	\$44.32
Percentage Change	N/A				

- Calculate the percentage change for July 1. (Use the previous price of \$36.75 as your denominator).
- Often, you go to calculate the percentage change for July 2, realize now you use \$39.47 for the previous price, not the June 28 price.
- Likewise, when you calculate the percentage change for July 3, use the previous day's price of \$47.39.
- Still is all of the other stocks.
- On which day did the stock price increase by the greatest percentage?

3. One very useful skill to have when working with percentages is the ability to quickly add or subtract a given percentage without a calculator. For example, to increase a price by 2%, you can simply multiply it by the factor 1.02:

$$100\% + 2\% = 102\% ; \text{Remember that "percent" literally means "divide by 100," so } 102\% = \frac{102}{100} = 1.02$$

Likewise, to decrease a number by 2%, you would simply multiply it by 0.98:

$$100\% - 2\% = 98\% ; \text{Remember that "percent" literally means "divide by 100," so } 98\% = \frac{98}{100} = 0.98$$

- To increase a price by 20%, what would you multiply it by?

Translational Systems Biology Yoram Vodovotz, Gary An, 2014-10-08 Are we satisfied with the rate of drug development? Are we happy with the drugs that come to market? Are we getting our money's worth in spending for basic biomedical research? In *Translational Systems Biology*, Drs. Yoram Vodovotz and Gary An address these questions by providing a foundational description of the barriers facing biomedical research today and the immediate future and how these barriers could be overcome through the adoption of a robust and scalable approach that will form the underpinning of biomedical research for the future. By using a combination of essays providing the intellectual basis of the Translational Dilemma and reports of examples in the study of inflammation, the content of *Translational Systems Biology* will remain relevant as technology and knowledge advances bring broad translational applicability to other diseases. Translational systems biology is an integrated, multi-scale, evidence-based approach that combines laboratory, clinical, and computational methods with an explicit goal of developing effective means of control of biological processes for improving human health and rapid clinical application. This comprehensive approach to date has been utilized for *in silico* studies of sepsis, trauma, hemorrhage, and traumatic brain injury, acute liver failure, wound healing, and inflammation. Provides an explicit, reasoned, and systematic approach to dealing with the challenges of translational science across disciplines. Establishes the case for including computational modeling at all stages of biomedical research and healthcare delivery, from early pre-clinical studies to long-term care, by clearly delineating efficiency and cost-saving important to business investment. Guides readers on how to communicate across domains and disciplines, particularly between biologists and computational researchers, to effectively develop multi- and trans-disciplinary research teams.

Improving outcomes in cerebral palsy with early intervention: new translational approaches Anna Purna Basu, Gavin John Clowry, 2015-03-30 The aim of this Research Topic was to collate articles describing prediction of outcomes of pre- and perinatal lesions leading to cerebral palsy, basic research in animal models and human subjects, and ideas for and trials of interventions in the first two years of life.
