*Pedagogy in a New Tonality* Peter Gouzouasis, 2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms. It is about the use of creative instructional strategies in K-12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum. Over twenty teachers conducted research in their classrooms on the implementation of creative strategies, tactics, graphics, organizers, and visual journals in teaching and learning. They have written their inquiries in a narrative style informed by various forms of arts-based educational research. Their research is approachable and usable by other teachers who are interested in becoming reflective, reflexive practitioners. Many of the strategies, tactics, and graphics organizers are described by Barrie Bennett in his widely used textbook *Beyond Monet: The Artful Science of Instructional Intelligence*. However, through their journeys of becoming teacher-learner researchers, many discovered numerous creative variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning. Thus, this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century.

**Theory of Knowledge for the IB Diploma** Richard van de Lagemaat, 2014-11-20 Written by experienced practitioners, this resource for Theory of Knowledge for the IB Diploma offers comprehensive coverage of and support for the new subject guide. This edition of Theory of Knowledge for the IB Diploma is fully revised for first examination in September 2015. The coursebook is a comprehensive, original, and accessible approach to Theory of Knowledge which covers all aspects of the revised subject guide. A fresh design ensures the content is accessible and user-friendly, and there is detailed guidance on how to approach the TOK essay and presentation. This edition supports the stronger emphasis on the distinction between personal and shared knowledge and the new areas of knowledge: religion and indigenous knowledge.
