The following diagram shows part of a circle with centre O and radius 4 cm .

Chord AB has a length of 5 cm and $\angle AOB = \theta$.

(a) Find the value of θ , giving your answer in radians.

[3]

(b) Find the area of the shaded region.

[3]

$$a) \quad \cos C = \frac{a^2 + b^2 - c^2}{2ab}$$

$$\cos C = \frac{4^2 + 4^2 - 5^2}{2(4)(4)} = \frac{1}{32}$$

An outbreak of a respiratory disease first reported in Wuhan, China, in December 2019, and the causative agent was discovered in January 2020 to be a novel betacoronavirus of the same subgenus as SARS-CoV and named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Coronavirus disease 2019 (COVID-19) has rapidly disseminated worldwide with clinical manifestations ranging from mild respiratory symptoms to severe pneumonia and a fatality rate estimated around 2%. Person-to-person transmission is occurring both in the community and healthcare settings. The World Health Organization (WHO) has recently declared the COVID-19 epidemic a public health emergency of international concern. The ongoing outbreak presents many clinical and public health management challenges due to limited understanding of viral pathogenesis, risk factors for infection, natural history of disease, including clinical presentation and outcomes, prognostic factors for severe illness, period of infectivity, modes and extent of virus inter-human transmission, as well as effective preventive measures and public health response and containment interventions. There are no antiviral treatment nor vaccine available, but fast-track research and development efforts, including clinical therapeutic trials, are ongoing across the world. Managing this serious epidemic requires the appropriate deployment of limited human resources across all cadres of health care and public health staff, including clinical laboratory, managerial and epidemiological data analysis and risk assessment experts. It presents challenges around public communication and messaging around risk with the potential for misinformation and disinformation. Therefore, integrated operational research and intervention learning from experiences across different fields and settings should contribute towards better understanding and managing COVID-19. This Research Topic aims to highlight interdisciplinary research approaches deployed during the COVID-19 epidemic, addressing knowledge gaps and generating evidence for its improved management and control. It will incorporate critical theoretically informed and empirically grounded original research contributions using diverse approaches: experimental, observational and intervention studies, conceptual framing, expert opinions and reviews from across the world. The Research Topic proposes a multi-dimensional approach to improving

the management of COVID 19 with scientific contributions from all areas of virology immunology clinical microbiology epidemiology therapeutics communications as well as infection prevention and public health risk assessment and management studies

Creating Symmetry Frank A. Farris, 2015-06-02 A step by step illustrated introduction to the astounding mathematics of symmetry This lavishly illustrated book provides a hands on step by step introduction to the intriguing mathematics of symmetry Instead of breaking up patterns into blocks a sort of potato stamp method Frank Farris offers a completely new waveform approach that enables you to create an endless variety of rosettes friezes and wallpaper patterns dazzling art images where the beauty of nature meets the precision of mathematics Featuring more than 100 stunning color illustrations and requiring only a modest background in math *Creating Symmetry* begins by addressing the enigma of a simple curve whose curious symmetry seems unexplained by its formula Farris describes how complex numbers unlock the mystery and how they lead to the next steps on an engaging path to constructing waveforms He explains how to devise waveforms for each of the 17 possible wallpaper types and then guides you through a host of other fascinating topics in symmetry such as color reversing patterns three color patterns polyhedral symmetry and hyperbolic symmetry Along the way Farris demonstrates how to marry waveforms with photographic images to construct beautiful symmetry patterns as he gradually familiarizes you with more advanced mathematics including group theory functional analysis and partial differential equations As you progress through the book you ll learn how to create breathtaking art images of your own Fun accessible and challenging *Creating Symmetry* features numerous examples and exercises throughout as well as engaging discussions of the history behind the mathematics presented in the book

God and the Big Existential Questions Anthony Walsh, 2023-11-25 Existential questions are deep and profound philosophical questions that concern our very existence such as How did we get here What is the meaning and purpose of my life Is there a God and What happens to me when I die Humans have been asking these questions for as long as we have been able to think and reason and each possible answer spawns a host of additional questions Existential questions are perhaps ultimately unanswerable but we must accept the challenge and try and must entertain the possibility that they may be The author looks to science and philosophy for answers to such questions Both modes of thought seek knowledge in their own manner but philosophers must develop a greater tolerance for ambiguity than scientists because they ask many questions that are only partially amenable or not at all to empirical testing and for which there are no universally agreed upon answers Philosophy thus ventures into areas that science cannot or will not go Scientists and philosophers work with different goals and are judged by different standards although they both share the tools of logic conceptual analysis and rigorous argumentation Questions for which we can acquire definite answers through mathematics and experimentation are the realm of science questions for which we have no definite answers are the grist for the philosopher s mill It is this intellectual uncertainty in which the value of philosophy resides because it engages a liberating doubt
