The Self-Transforming School Brian J. Caldwell, Jim M. Spinks, 2013-07-18 The Self Transforming School combines an insightful meta analysis of factors contributing to the success of schools and an examination of powerful mega trends that are shaping developments in education to offer the first mega analysis in education policy and practice The book spans fifty years beginning with Caldwell and Spinks ground breaking work The Self Managing School which advocated innovative approaches that are now accepted as preferred practice before offering a prognosis and plan for the future The book argues that all schools in all settings can secure success for all students in an era where society and the economy are changing constantly and dramatically Although schools find some support in local and global networks externally designed re structuring re staffing or command and control direction isn t sufficient to achieve transformation Instead of replicating particular approaches to achieve modest improvement leadership of the highest quality needs to be deeply embedded in schools and their systems Caldwell and Spinks propose three important points that need to be taken into consideration schools are often at different stages of self transformation self transformation requires a high level of professionalism and must include teacher education and on going professional development funding is critically important and efforts to build a capacity for self transformation are constrained by what is available The book gives particular attention to developments in Australia Brazil Canada England Finland Hong Kong India New Zealand Shanghai Singapore and the United States It will be of key interest to school leaders policy makers and academics and postgraduate students engaged in research on equity student performance in highly disadvantaged settings and education policy

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education

the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily *Science Education International* ,2001
