The Status of Student Involvement in University Governance in Kenya M. Mulinge, N. Arasa, 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya

History of Arbovirology: Memories from the Field Nikos Vasilakis,Laura D. Kramer,2023-05-08 These books bring together a panel of expert arbovirologists who recall the history of arbovirology from very personal perspectives In these timely volumes the authors describe seminal moments in their experiences in the field and how they integrated these findings with lab studies to further clarify the ecology and epidemiology of diverse arboviruses Authors identify the most pressing questions that remain to be answered providing a basis for current research and a stimulus to engage those entering the field Over the last 20 years a generational gap has developed between the giants of arbovirus research and discovery and the new generation This gap developed due to an ebbing of training and investment in passing the scepter to the next generation leading to a lack of continuity among the generations that threatens to derail the rich history of virus discovery field epidemiology and understanding of the richness of diversity that surrounds us This lack of continuity may have immediate and disastrous consequences for public health when yet to be discovered arboviruses emerge The purpose of these books is to bridge this gap by providing a historical context for the work being done today and provide continuity between the generations To this end the books provide a narrative of the thrill of scientific discovery and excitement of field adventures and lab studies of that generation essential reading for every arbovirologist and highly recommended for all virologists and public health officials as well as those students considering future research options Volume I consists of the personal reflections of

arbovirologists who played a significant role in the advancement of arbovirology across the globe Volume II transitions to descriptions of region specific and virus family specific perspectives of arbovirology as well as recollections of the early events of molecular advances and pathogenesis studies Volume I presents personal reflections from arbovirologists key to the understanding and advancement of this field Offers a comprehensive historical analysis of arbovirology by crucial contributors to this field First hand narratives of seminal studies and experiments illuminating how these have contributed to current knowledge
