Güldemann,2018-09-10 This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa the continent with the largest number of languages in the world It covers the major domains of linguistics offering both a representative picture of Africa s linguistic landscape as well as new and at times unconventional perspectives The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics Monetary Policy and the Oil Market Naoyuki Yoshino,Farhad Taghizadeh-Hesary,2016-03-04 While oil price fluctuations in the past can be explained

by pure supply factors this book argues that it is monetary policy that plays a significant role in setting global oil prices It is a key factor often neglected in much of the earlier literature on the determinants of asset prices including oil prices However this book presents a framework for modeling oil prices while incorporating monetary policy It also provides a complete theoretical basis of the determinants of crude oil prices and the transmission channels of oil shocks to the economy Moreover using several up to date surveys and examples from the real world this book gives insight into the empirical side of energy economics The empirical studies offer explanations for the impact of monetary policy on crude oil prices in different periods including during the subprime mortgage crisis of 2008 2009 the impact of oil price variations on developed and emerging economies the effectiveness of monetary policy in the Japanese economy incorporating energy prices and the macroeconomic impacts of oil price movements in trade linked cases This must know information on energy economics is presented in a reader friendly format without being overloaded with excessive and complicated calculations enUsed false QFormat true Name Subtle Emphasis *The Fight Against Child Trafficking* Élisabeth Narminio,2023-03-23 This book analyzes the contemporary effects of anti trafficking policies on children trafficked for labour It explores different dimensions of private and public apparatuses through which the governmentality of child trafficking manifests itself at a regional and interregional level It investigates questions linked to the diffusion of the child trafficking norm between and within regions and

stakeholders to the criminalization and vulnerabilization of child traffickees and to private governance of anti trafficking initiatives in particular concerning social sustainability of business supply chains Drawing on extensive fieldwork with government police justice civil society multilateral organizations and businesses in the EU and in ASEAN the book argues that child traffickees are subjected not only to physical and psychological violence but also to structural violence The book concludes with suggestions to improve current anti trafficking regimes This book will be of key interest to scholars students and practitioners in EU Studies Southeast Asian Studies Regionalism Human Rights Law International Relations and International Political Economy Chapters 3 6 and the Conclusion of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Overripe Economy Alan Nasser, 2018-06-20 From industrialisation to the present day Overripe Economy is a genealogy of the emergence of a finance ridden authoritarian austerity plagued American capitalism This panoramic political economic history of the country surveys the ruthlessly competitive capitalism of the nineteenth century the maturation of industrial capitalism in the 1920s the rise and fall of capitalism s Golden Age and the ensuing decline towards the modern era Alan Nasser shows why the emergence of the persistent austerity of financialised neoliberal capitalism is the natural outcome of mature capitalism s evolution revealing both the key structural and political vulnerabilities of capitalism itself and points towards the kind of system that can transcend it At the centre of the argument is capitalism s ultimatum either a new normal of persistent austerity declining democracy and a privatised state or a polity and economy characterised by an economic democracy that can ensure both higher wages and a shorter working week

The Contradictions of Austerity Jeffrey Sommers, Charles Woolfson, 2014-04-24 The great financial crisis of 2008 and the ensuing global economic and financial turmoil have launched a search for models for recovery The advocates of austerity present the Baltic States as countries that through discipline and sacrifice showed the way out of crisis They have proposed the Baltic model of radical public sector cuts wage reductions labor market reforms and reductions in living standards for other troubled Eurozone countries to emulate Yet the reality of the Baltic austerity fix has been neither fully accepted by its peoples nor is it fully a success This book explains why and what are the real social and economic costs of the Baltic austerity model We examine each of the Baltic States by connecting national level studies within a European and global political economy thereby delivering comparative breadth that supersedes localized understandings of the crisis Thus for each of the three Baltic states individual chapters explore the different economic and social dimensions of neo liberal post communism and the subsequent wider global economic and financial crisis in which these newly financialized economies have found themselves especially vulnerable The austerity model adopted by Baltic national governments in response to the crisis reveals the profound vulnerabilities created by their unwavering commitment to liberalized economies not least in terms of the significant exit of their labor forces and consequent population loss This book looks beyond basic financial metrics claiming a success story for the Baltic austerity model to reveal the damaging economic and social consequences first of neo liberal policies adopted during transition and latterly of austerity measures based on internal devaluation Combined these policies undermine the possibility of longer term recovery and even social and economic sustainability not to mention prospects for successful integration in the now faltering European project that has departed from its Social Model roots
