Intelligences Curriculum on Student Performance Thanh T. Nguyen,2002-06-08 The Fuller School is one of the six elementary schools in Gloucester Massachusetts a small urban community known for shipbuilding and fishing Fuller students come from a wide range of socioeconomic backgrounds from public housing facilities to affluent families and a variety of ethnic groups including Italian Hispanic and Vietnamese With its diverse population the Fuller School represented an excellent environment to test the use of Multiple Intelligences MI as a foundation for its curriculum This study aimed to

examine one of the ten objectives of the FIRST Schools and Teacher Program Grant To improve student achievement on standardized tests by using multiple intelligences instruction The results of the California Achievement Test 5 CAT 5 given at grade 5 tended to show no differences between students in the MI and the traditional school program Although no association between CAT 5 outcomes and the MI treatment were found two report card outcomes at the sixth grade level Math and Physical Education and an interaction of Program type with Home language on Music were found to be significant By and large the magnitude of these differences was not large enough to conclude that the MI treatment was effective in producing larger standardized test scores than students in the non MI program Yet considering that the MI program emphasizes different kinds of activities and more diverse ways of learning and provides an alternative to the traditional classroom this result of no differences between programs can be thought of a success for the MI community Participants in the MI program performed just as well as those who had been in the traditional program This case study is unusual because public schools rarely assigned their students randomly to experimental programs through a lottery process Although students were randomly assigned to MI and traditional classrooms accounting for several additional demographic variables in the students personal and family background helped to characterize the differences in student performance in language mathematics social studies science arts physical education and music Educators should find the results encouraging even with no differences in test scores and grades because this indicates that MI approaches are competitive with traditional ones These findings shed new light on the application of MI and given the growth in its use provides a much needed comparison for those interested in implementing it as one component of educational reform

Civic Education in the Elementary Grades Dana Mitra, Stephanie C. Serriere, 2015 As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Based on a 5 year study of an elementary school this book shows how civic engagement can be purposive and critical a way to encourage young people to examine their environment to notice and question injustices and to take action to make a difference in their communities and school Focusing on the intersection of student voice and critical inquiry the book describes how to embed civic engagement into curriculum school decision making processes and whole school activities Chapters provide an overview of what research has demonstrated about civic engagement at the classroom school and community levels including detailed descriptions of activities and lessons for practice Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life Book Features A vivid portrait of a typical public school that wants to do more than teach to the test An examination of the conditions that enable young people to participate in democratic practices including identifying and questioning injustices Concrete examples of student voice and critical inquiry in classroom contexts Practices and activities that encourage children to get along with others exchange perspectives and work across differences Offers a suggestive range of evidence that high quality civic engagement initiatives can enhance students academic social and emotional engagement It reveals the nitty gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem solving peer collaboration literacy and social studies learning and development of empathy and mutual trust From the Foreword by Meira Levinson Mitra and Serriere show us not only that elementary aged children are capable of civic engagement but how such engagement can be nurtured in the classroom Children can be active civic participants this book demonstrates both the power of this idea and how we might accomplish this essential task Beth C Rubin Rutgers University *Suggested Guidelines for Consumer Education Grades K-12* United States.
