

6. When you are done, save your proof as Proof Conditional 3.
 Congratulations

The default and generous uses of the biconditional rules are exactly like those for the conditional connective, and **Add Support Steps** works exactly as you would expect.

Exercises

8.17 If you skipped any of the **You try it** sections, go back and do them now. Submit the files Proof Conditional 1, Proof Conditional 2, and Proof Conditional 3.

In the following exercises we return to the patterns of inference discussed in Exercise 8.1. Some of these are valid, some invalid. For each valid pattern, construct a formal proof in Fitch. For each invalid pattern, give a counterexample using Tarski's World. To give a counterexample in these cases, you will have to come up with sentences of the blocks language that fit the pattern, and a world that makes those specific premises true and the conclusion false. Submit both the world and the sentence file. In the sentence file, list the premises first and the conclusion last.

- 8.18 **Affirming the Consequent:**
 ✓ From $A \rightarrow B$ and B , infer A .
- 8.20 **Strengthening the Antecedent:**
 ✓ From $B \rightarrow C$, infer $(A \wedge B) \rightarrow C$.
- 8.22 **Strengthening the Consequent:**
 ✓ From $A \rightarrow B$, infer $A \rightarrow (B \wedge C)$.
- 8.24 **Constructive Dilemma:**
 ✓ From $A \vee B$, $A \rightarrow C$, and $B \rightarrow D$, infer $C \vee D$.

- 8.19 **Modus Tollens:**
 ✓ From $A \rightarrow B$ and $\neg B$, infer $\neg A$.
- 8.21 **Weakening the Antecedent:**
 ✓ From $B \rightarrow C$, infer $(A \vee B) \rightarrow C$.
- 8.23 **Weakening the Consequent:**
 ✓ From $A \rightarrow B$, infer $A \rightarrow (B \vee C)$.
- 8.25 **Transitivity of the Biconditional:**
 ✓ From $A \leftrightarrow B$ and $B \leftrightarrow C$, infer $A \leftrightarrow C$.

Use Fitch to construct formal proofs for the following arguments. In two cases, you may find yourself re-proving an instance of the law of Excluded Middle, $P \vee \neg P$, in order to complete your proof. If you've forgotten how to do that, look back at your solution to Exercise 6.33. Alternatively, with the permission of your instructor, you may use **Taut Con** to justify an instance of Excluded Middle.

8.26

$$\begin{array}{|l} \hline P \rightarrow (Q \rightarrow P) \end{array}$$

8.27

$$\begin{array}{|l} \hline (P \rightarrow (Q \rightarrow R)) \leftrightarrow ((P \wedge Q) \rightarrow R) \end{array}$$

Language Proof And Logic 2nd Edition Answer Key:

Logic, Reasoning, and Rationality Erik Weber, Dietlinde Wouters, Joke Meheus, 2014-08-06 This book contains a selection of the papers presented at the Logic Reasoning and Rationality 2010 conference LRR10 in Ghent The conference aimed at stimulating the use of formal frameworks to explicate concrete cases of human reasoning and conversely to challenge scholars in formal studies by presenting them with interesting new cases of actual reasoning According to the members of the Wiener Kreis there was a strong connection between logic reasoning and rationality and that human reasoning is rational in so far as it is based on classical logic Later this belief came under attack and logic was deemed inadequate to explicate actual cases of human reasoning Today there is a growing interest in reconnecting logic reasoning and rationality A central motor for this change was the development of non classical logics and non classical formal frameworks The book contains contributions in various non classical formal frameworks case studies that enhance our apprehension of concrete reasoning patterns and studies of the philosophical implications for our understanding of the notions of rationality
