## ECO DECT

During a call, the level of the handset's radio signal adjusts automatically according to the distance between the handset and base station: the shorter the distance, the lower the signal strength (radiation). The handset's radio signal is switched off when it is in standby mode. The base station, however, maintains contact with the handset with fewer radio signals. In addition, the base station radio signals are switched off when the No Radiation setting is enabled.

MENU ▶ Settings ▶ OK ▶ Base ▶ OK ▶ ECO DECT ▶ OK

▶ No Radiation ▶ OK (✓ = radiation switched off, icon in the left-hand corner of the display)

### Please note

- ◆ All registered handsets must support this feature.
- ◆ For quick connection of incoming calls the handset repeatedly switches to reception mode for short periods. This increases energy consumption and therefore reduces the standby and talk times.
